OUR SEED WAREHOUSE. LOADING OUT FOR THE DEPOTS."

To Seed Buyers.

One class caters to the patronage of those who are misled by overdrawn pictures and statements that are deliberately un-

Another class takes advantage Another class takes advantage of the fears of those who through their natural desire to secure the best seeds, will pay fancy prices for what often proves to be very ordinary stock.

There is yet another class which seeks the trade of those who want the best seeds possible to procure and are willing to pay a reasonable price for them.

pay a reasonable price for them.
To this class our Catalogue belongs. Our Seeds we believe to be as good as can be obtained anywhere.

Our descriptions are brief and accurate.
Our illustrations are true to

nature.

nature.
Our prices are reasonable.
We trust that our efforts to simplify the task of selection and dignify the sale of seeds will meet with the approval of intelligent purchasers.
Respectfully,

Northrup, King & Co.

Modes of Ordering and Sending Money.

SEEDS BY MAIL.—Please remember that our prices include PREPAYMENT OF POSTAGE by us on all Seeds ordered by the PACKET, OUNCE, POUND, PINT or QUART; also on PLANTS and BULBS. Deduct 8 cents per pound from postpaid prices on Seeds ordered sent by Express or Freight.

EF We guarantee the safe delivery of all Seeds sent by mail.

SEEDS BY EXPRESS OR FREIGHT.—We deliver Seeds to any Express or Railroad Company in Minneapolis, the purchaser to pay transportation charges upon receipt of goods. EF Deduct 8 cents per pound from postpaid prices on seeds ordered sent by Express or Freight. When possible, give full shipping instructions. In the absence of these particulars we will use our best judgment.

No charge for Bays, Boxes or Cartage on Seeds bought at prices herein named.

PURCHASING BY EXPRESS.—Express Offices have now purchasing departments in all their offices. If you wish to order goods from us to be sent by Express, ask for a purchasing order blank at any Express Office, and it will be supplied and forwarded by them without extra charge, other than the usual rates for returning goods.

NAME, ADDRESS, ETC.—When ordering, give name and full address. Many orders reach us every season in which the Name or Post Office address is lacking. It is of course impossible for us to fill these orders until they are identified.

HOW TO SEND MONEY.—Money can be sent safely either by P. O. Order, Bank Draft, Express Order or Registered Letter. If your order amounts to \$1.00 or more, it is best to send by one of the above methods. Postage Stamps received the same as Cash.

Morthrup, Iking & Co.'s "Primers."

There is a great demand for practical instruction on Farming and Gardening subjects. Enough books are written, but they do not, as a rule, touch the spot.

They say too much; they teil too little. Farmers do not have time to wade through page after page of dry, impractical matter; to "search the haystack for the needle." They want Info. mation, and they want it in such shape that they can apply it to their own needs.

Earnestly desiring to be identified with that which is highest and best in progressive agriculture, we have adopted the plan of issuing a series of PRIMERS on Agricultural Subjects, written for us by the best authorities on the matters of which they treat.

These PRIMERS will appear from year to year in pamphlet form, printed on good paper, finely illustrated and of uniform size, so that, if desired, they may be bound in book form.

For particulars of our PRIMERS see page 1.

These PRIMERS will not be sold. They will be given to customers who purchase Seeds from this Catalogue to the value of fifty cents, and who ask for them when ordering.

SPECIAL NOTICE.—Do not overlook our folder, "The Farmer's Garden." (See page 34.) It is sent free to our customers who request it when ordering.

HRUP KING & COS

FARM SEEDS

From the World's Golden Grain Belt.

Pages 2 to 20.

The whole drift of trade toward the natural source of supply has led us to devote unusual attention to the culture of improved farm seeds, the result being that we have become the largest growers in the United States of fine seed grain, etc.

We offer Northern grown stocks of the best varieties, carefully selected, thoroughly recleaned, and at prices so reasonable as to enable every farmer who wishes to get a new start in seed oats, wheat, barley, corn, etc., to do so at a very small expense.

pense.

Please note our liberal terms of sale, viz.: If any seeds received from us are not satisfactory on receipt and examination, they are to be returned at our expense, and the money that has been paid for them will be refunded.

VEGETABLE SEEDS.

Pages 20 to 44.

Our list of Vegetable Seeds comprises the best varieties only. Attention is called to the fact that in leading sorts we mention the number of seeds to be found in our packets. Notice that an order for Vegetable or Flower Seeds in chaser to a FREE package of our SCHOOL GARDEN FLOWER 5.XTURE, and to the privilege of competing for the \$150.00 CASH PRIZES.

FLOWER SEEDS AND BULBS.

Pages 44 to 55.

Our fist of Flower Seeds embraces all the popular and easily grown varieties, as well as the best novelties of recent introduction. It will be noted that all along the line we have made radical reductions in PRICES, and, in so doing, we have sacrificed new parties of the line we have seed the line we have sacrificed and in so doing, we have sacrificed the line we have seed the line we have made radical reductions in PRICES, and line we have made radical reductions in PRICES, and line we have made radical reductions in PRICES, and line we have made radical reductions in PRICES, and line we have made radical reductions in PRICES, and line we have made radical reductions in PRICES, and line we have seen the line we have made radical reductions in PRICES, and line we have made radical reductions in PRICES, and line we have made radical reductions in PRICES, and line we have made radical reductions in PRICES, and line we have made radical reductions in PRICES, and line we have made radical reductions in PRICES, and line we have made radical reductions in PRICES, and line we have made radical reductions in PRICES, and line we have made radical reductions in PRICES, and line we have made radical reductions in PRICES, and line we have made radical reductions in PRICES, and line we have seed the line we have made radical reductions in PRICES, and line we have made radical reductions in PRICES, and line we have made radical reductions in PRICES, and line we have made radical reductions in PRICES, and line we have made radical reductions in PRICES, and line we have made radical reductions i

obtainable,
Our Packets, we believe, contain MORE SEEDS, in proportion to price asked, than those put out by any other house,
Notice that an order for Flower or Vegetable Seeds in packets, to the value of 75 CENTS, entitles the purchaser to a FREE package of our SCHOOL GARDEN FLOWER MIXTURE, and to compete for the \$150.00 CASH PRIZES.

LAWN SEED.

Page 56.

We cannot too highly recommend our "STERLING" Lawn Grass Seed. The fact that during the past fifteen years we have sold over 20,000 bushels of this mixture speaks more strongly as to the satisfaction it has given than any words we could utter in its praise. The grasses used in our "STERLING" Lawn Mixture are analyzed as to purity and tested as to germination. We send it to all parts of the United States. If you want a GOOD LAWN, try our "STERLING" Lawn Grass.

OUR "PRIMERS"

Free to Customers.

The desire to closely identify our selves with the interests of our customers has led us to adopt the plan of issuing a series of pamphlets on agricultural subjects, written by the best authorities on the matters of which they treat. These pamphlets, or "Primers," as we style them, will appear from year to year and will be of uniform size, so that if desired, they can be eventually bound in book form. We shall endeavor to have the contents of each succeeding Primer so notable in its character as to render unnecessary the suggestion that they be carefully pre-

unnecessary the suggestion that they be carefully pre-

served.

served.

Our primary object in issuing these PRIMERS is to obtain new customers. We are in hopes that the desire to obtain the Primers will turn some orders our way that might otherwise go elsewhere, for once we secure a customer, we usually manage to keep him. These Primers, therefore, will positively not be sold, but will be sent only to those who purchase seeds from this catalogue to the value of 50 CENTS. A purchase from this catalogue amounting to 50 cents secures either one of the Primers. A purchase amounting to \$1.00 secures both.

PRIMER NO. 1.

Shaw's New System of Pasturing Sheep. By Thos. Shaw,

By Thos. Shaw.

Is from the pen of Prof. Thos. Shaw, of the University of Minnesota. It treats of the pasturing of sheep on foods sown for them, other than grasses is as old as the world, but pasturing them chiefly on roods other than grasses is an entirely new system, hence the name given to the book. In this book Prof. Shaw gives his experience in growing these foods and in pasturing sheep on them. The way in which the various foods were grown and pastured are described briefly and with much clearness. The information on this point alone is very valuable. It is also shown how the farm, er can adapt the system to his own conditions, howsover or wheresoever he may be situated. This system will, without doubt, in the near future revolutionize the methods of growing sheep in all the arable sections in the United States. The experience, thought and labor of many years are condensed in this book. Applied, it will mean millions of dollars to the farmers of this country.

PRIMER NO. 2.

HOW TO SOW GRASS AND CLOVER SEEDS. By W. J. Beal.

Each year we receive a great many requests for information regarding the requests for information regarding the sowing of grass and clover seeds, and it is very difficult to answer these questions properly within the limits of a letter, so we decided that Primer No. 2 should treat on this important subject.

It has been written for us by Prof. W. J. Beal, of the Michigan Agricultural College, author of Grasses of North America, and the highest living authority on the subject. It will be found that this Primer contains information vital to every one who sows grass and clover seeds, no matter how experienced they may be.

Remember that these "Primers" do not cost our customers one cent.

customers one cent.

CASH PRIZES

Particulars of a very interesting contest will be found in the four-page insert between pages 28 and 29 of this book. It will be noticed that we offer \$100.00 in CASH for the GREATEST NUMBER of species produced from a single packet of our SCHOOL CARDEN FLOWER MIXTURE, \$20.00 in CASH for the BEST PHOTOGRAPH OF THE GARDENS raised from that mixture, \$20.00 in CASH for the BEST ESSAY on how to

PHOTOGRAPH OF THE GARDENS raised from that mixture, \$20.00 in cash for the BEST ESSAY on how to grow the School Garden flower mixture.

We hope that every one who receives a copy of this catalogue will try a package of our school garden mixture. This mixture embraces all of the rarest and most popular annual sorts. In fact, it will secure for the purchaser a complete flower garden. Never before was such value in flower seeds offered for the money. Notice, too, that a full size packet of our school garden flower mixture is sent free as a premium to those purchasing vegetable or flower seeds in packets to the amount of 75 cents, two packages where the order amounts to \$1.50, etc., the purchaser being entitled to compete for the \$1.50,00 in Cash PRIZES. tled to compete for the \$150.00 IN CASH PRIZES.

FARM SEEDS CAREFULLY SELECTED NORTHERN

FROM THE WORLD'S GOLDEN GRAIN BELT.

GOLD MEDAL NORTHRUP, KING & CO., INTERNATIONAL EXPOSITION

GRASS, CLOVER AND FIELD SEED.

The above is a fac-simile of the only gold medal awarded for Seeds at the Trans-Mississippi and International Exposi-tion held in Omaha, 1898.

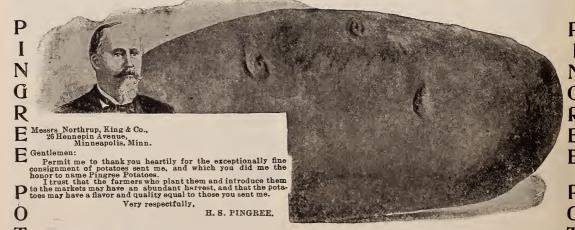

It has become a well established principle of agriculture that the farther North seeds can be grown and fully matured, the better they are. While this truth applies with equal force to nearly every kind of seed, the Northwest became so quickly famous for its cereals as to cause farmers everywhere to turn here for their sup-plies in that direction. This tendency has become so well recognized amongst the trade that many seedsmen of the East and Middle West have almost dropped Field Seeds from their catalogues.

The whole drift of trade towards the natural source of supply has led us to devote unusual attention to the culture of improved farm seeds, the result being that we have become the largest growers in the United States of fine seed grain, etc.

All practical farmers agree that seed, grown year after year under the same conditions of soil and climate, "runs out" after a time, rendering a change of seed not only desirable but necessary. To such we offer Northern Grown stocks of the best varieties, carefully selected, thoroughly re-cleaned, and at prices so reasonable as to enable every farmer who wishes to get a new start in seed oats, wheat, barley, com, etc., to do so at a very small

Please note our liberal terms of sale, viz., if any seeds received from us are not satisfactory on receipt and examination, they are to be returned at our expense and the money that has been paid for

them will be refunded

If FINE TABLE and LONG KEEPING qualities, combined with GREAT PRODUCTIVENESS, ever warranted the introduction of a potato, we are justified in sending out the PINGREE, believing that it will find favor with all who grow it, and that it will take care of itself in the battle for popular favor. The PINGREE is a main crop potato; is productive to an extraordinary degree. The tubers are bunched closely in growing, which materially lessens the labor of harvesting. The potato itself is of the size and shape best liked in the leading markets. The skin is of a bright, light russet color. Eyes are few and nearly flush with the surface. In quality nothing can surpass it. In fact, in this particular we know of no sort that equals it. Its snowy whiteness when cooked, together with its dry and floury nature, has made it a favorite on every table where it has been tried.

PRICE.

The very reasonable price at which we offer this potato will enable all who are disposed to try it to do so without paying the extravagant rates usually asked for new varieties. We are sure that all who try them will be greatly pleased with their investment. Pound, 25c; three pounds, 60c; postage paid. By express or freight at purchaser's expense, peck, 75c; bushel, \$2.25; barrel of three bushels, \$5.00.

PINGREE POTATO EYES BY MAIL.

It has been conclusively proven that potatoes cut to single eyes give the largest yields and best results generally. They can be sent without danger of freezing, and by our improved method of preparing for shipment, will keep in good condition for months. One hundred eyes of the PINGREE potato will be sent postpaid to any address on receipt of One Dollar, and are warranted to reach the purchaser in good condition for planting.

NORTHRUP, KING & CO.'S EXTRA EARLY OHIO POTATOES.

EXTRA EARLY OHIO POTATOES. Northrup, King & Co.'s Special Stock. We consider these to be me earliest, purest and altogether the handsomest stock of Early Ohio Potatoes to be found anywhere. On these points, we challenge comparison with stock from any other source. We do not admit that its equal exists among Early Ohio Potatoes. They are grown under conditions that make them cost more than common stock, they are selected with the utmost care, and the result is grand, such as to delight everyone who knows and appreciates a good potato. Everyone of them is a "picture" of what an Early Ohio Potato should be. Stock Limited, 100 eyes, by mail, postpaid 80c; by freight, peck, 40c; bu., \$1.25; bbl., \$3.50

EARLY OHIO. We do not now grow our Early Ohio Potatoes. Minneapolis is such a large soci potato receiving market and shipping point that we have found it to be a better plan to select each year, a few carloads of Ohios out of the many coming each day during the fall and early winter. In this way we have our pick out of many thousands of bushels, and we usually have better stock, than if we felt obliged to first dispose of those of our own growth. Our stock will please the buyer.

100 eyes, by mail, postpaid, 60c; peck, 35c; bu., \$1.00; bbl., \$3.00.

EXTRA EARLY TRIUMPH,—(Bliss.)

Northern Grown Seed Potatoes.

No Potatoes grown can be compared with those produced in the North, either for VIGOR and FREEDOM FROM DISEASE, or PRODUCING and LONG KEEPING QUALITIES. Our stock is so fine and our prices so low that it is a particularly favorable time to get into a stock of some of the newer and better sorts.

SHIPMENT will be made at any date ordered, but where no special instructions to the contrary are given, will hold until in our judgment there will be no danger from freezing. Write for special prices on carload or large lots.

EXTRA EARLY VARIETIES.

(Our barrels hold plump 3 BUSHELS.)

(Our pariets note plump 3 Bestieles.)			
EARLY FORTUNE. (New.) A very early variety, sent out with extraordinary claims as to its yielding qualities. It is distinctive in appearance, being longish: flesh and skin white	Pk.	Bu.	Bbl.
and very attractive. Eyes very prominent	50c	\$1.25	\$3.50

POTATO EYES BY MAIL.

This special collection of 25 eyes each of N., K. & Co.'s Extra Early Ohio, Extra Early Triumph, Carman No. 3 and N. K. & CO.'S PINGREE, will enable all who wish to secure the genuine stock of these four grand varieties to secure same at very slight expense, and without freight charges. Remember that we warrant them to reach the purchaser in good growing condition, and that they will keep so until planting time. PRICE, by mail postpaid, \$1.00.

We believe that we are the originators of the system of sending potato eyes by mail. There are numerous advantages in procuring them in this shape. First: It has been conclusively proven that potatoes cut to single eyes give the largest yields and best results generally. Second: No freight charges to pay. Third: They can be sent

without danger of freezing. A customer can secure them in ample time for planting without incurring this for months.

N., K. &. Co.'s "PINGREE" POTATO. The best MAIN CROP potato ever offered. See page 2.

Dr. C. J. Alloway.

The following statement from one of the most prominent authorities on Agriculture in the Northwest speaks volumes in showing the superior quality of our Swedish Turnips (Rutabagas) MANGEL and other ROOT SEEDS:

"For eight years I have used your seeds with the greatest success. I wish especially to commend your MANGEL and RUTABAGA SEED as the BEST I EVER USED. My experience in farming covers a period of over 20 years, during which time I have rarely cultivated less than TEN TO TWENTY ACRES OF MANGEL WURZEL AND SWEDISH TURNIP. As a stock breeder, I have always considered them my most important crops. I have always considered them my most important crops. I have bought seed from nearly every prominent house in the United States and Canada, and sometimes have imported it direct from England, but NEVER MAVE I HAD THE UNIFORMLY GOOD RESULTS THAT YOUR SEED HAS GIVEN ME. In North Dakota, where I had the largest herd of thoroughbred cattle, AVERAGED FROM TWENTY TO THIRTY TONS OF ROOTS TO THE AVERAGED FROM TWENTY TO THIRTY TONS OF ROOTS TO THE AVERAGED FROM TWENTY TO THIRTY TONS OF ROOTS TO THE AVERAGED FROM TWENTY TO THIRTY TONS OF ROOTS TO THE AVERAGED FROM TWENTY TO THIRTY TONS OF ROOTS TO THE AVERAGED FROM TWENTY TO THIRTY TONS OF ROOTS TO THE AVERAGED FROM TWENTY TO THIRTY TONS OF ROOTS TO THE AVERAGED FROM TWENTY TO THIRTY TONS OF ROOTS TO THE AVERAGED FROM TWENTY TO THIRTY TONS OF ROOTS TO THE AVERAGED FROM TWENTY TO THIRTY TONS OF ROOTS TO THE AVERAGED FROM TWENTY TO THIRTY TONS OF ROOTS TO THE AVERAGED FROM TWENTY TO THIRTY TONS OF ROOTS TO THE AVERAGED FROM TWENTY TO THIRTY TONS OF ROOTS TO THE AVERAGED FROM TWENTY TO THIRTY TONS OF ROOTS TO THE AVERAGED FROM TWENTY TO THIRTY TONS OF ROOTS TO THE AVERAGED FROM TWENTY TO THE AVERAGE AVERAGE FROM TWENTY TO THE AVERAGE AVERAGE FROM TWENTY TO THE AVERAG

NOTE.—We value very highly the above expression from Dr. Alloway, who was State Veterinarian for North Dakota for three years; for a long time President of the Fine Stock Growers' Association of North Dakota; Lecturer to State Agricultural College, at Brookings, S. D.; Director in Grand Forks County Agricultural Society, and one of the largest, most progressive and successful stock breeders in the U. S.

A Field of N. K. & Co's Prize Winner Rutabaga.

N. K. & Co's Prize Winner Rutabaga. Prize Winner is a purple-topped variety, growing to a large size, with a single tap root and very small and fine top, short neck, smooth and symmetrical; is a certain cropper. It produces a very heavy weight per acre, and keeps sound and good until late in the spring. From reports received from those who have grown it, we do not hesitate to say that we possess the Handsomest and Best Stock of purple top Rutabagas in cultivation. We have sold many thousand pounds of this magnificent strain and have never received a single complaint about them. Large pkt. 5c; oz. 10c; ¼ 1b. 15c; lb, 50c; postpaid. By freight, lb. 40c; 5lbs. \$1.75; l0 lbs. \$3.25.

Carter's Imperial Hardy Swede. A standard English variety which produces extraordinary crops. Large pkt. 5c; oz. 10c; ¼ 1b. 15c; lb. 40c; postpaid. By freight, lb. 30c; 10 lbs. @ 25c. N. K. & Co's Prize Winner Rutabaga. Prize Winner

Sweet German. One of the very best sorts on account of its productiveness and quality. This consideration should count strongly with stock growers, all of whom understand that the quality of the feed regulates the quality of the product. Large pkt. 5c; oz. 10c; 4 lb. 20c; lb. 50c; postpaid. By express or freight, lb. 40c; 5 lbs. \$1.75.

Hurst's Monarch Swede. We first saw this splendid variety in England, and were the first to bring it to the attention of the American trade. It is very distinct in type, being of tankard shape. On account of the size it attains, it will yield from two to seven tons more to the acre than any other variety. Pkt. 5c; oz. 10c; 4 lb. 20c; lb. 60c; postpaid. By express or freight, lb. 50c; 5 lbs. \$2.25; 10 lbs. \$4.00.

If interested in Sheep try Thousand Headed Kale, Page 16.

Improved Mammoth Long Red. Our stock is a great improvement on the old variety. The roots are very large, uniformly straight and well formed. Color deep red. Roots solid. Tops small. Roots attain a large size. Produce an Oz., 5c; 4lb., 15c; Lb., 40c postpaid. By express or

solid. Tops small. Roots a freight, Lb., 30c; 51bs. @ 25c lb.

Mammoth Golden Giant Mangel. Very Large. Remarkably even in shape, of vigorous growth; has a fine neck and a very smooth skin. Flesh white, firm and sweet, much liked by cattle. Easily lifted from the ground, producing enormous crops. Excellent keeper, yields 40 to 60 tons per acre. Oz., 5c; ¼ lb., 15c; lb., 45c; postpaid. By freight, lb., 35c; 51bs. @ 30c per lb.

Red Globe Mangel. Simular to the Yellow Globe in general character, and, like it, well adapted to shallow soils. Oz., 10c; ¼ lb., 15c; lb., 40c. By freight, lb., 30c; 51bs, @ 25c.

Champion Yellow Globe Mangel. A favorite variety, very productive, easily pulled and a good keeper, It is spherical in shape, orange-yellow color, top tinged with green; flesh of the root white, firm and sugary. One of the best for light soils. Oz., 10c; ¼ lb., 15c; lb., 40c., postpaid. By freight, lb., 30c; 5 lbs, @ 25c. per lb.

light soils. Oz., 10c; ¼ lb., 15c; lb., 40c., postpaid. By freight, lb., 30c; 5 lbs, @
25c. per lb.

Taber's Gate Post Mangel. This is the production of one of the largest mangel specialists of England. It is thought by many to be the most profitable of all mangels, and is exceedingly popular in those sections where it is best known. It resembles somewhat the Golden Tankard in appearance, but is not so large; skin is yellow and smooth; flesh white and very firm. Oz., 5c; ¼ lb., 15c; lb., 45c, postpaid. By express or freight, lb., 35c.; 5 lbs. @ 30c.

Improved Golden Tankard. We have for years insisted that this was the best mangel grown, and each season strengthens us in the position we took when it was a comparatively unknownsort. We recommend it unqualifiedly as the best mangel by far for dairy farmers. It combines apparently all the fine points possible to condense into a mangel. The illustration (engraved from a photograph) shows the shape. The color is a deep rich yellow. The flesh is yellow and white in rings beautifully alternating with each other. On account of its shape enormous crops are grown, and it is easily lifted from the ground. Oz., 5c; ¼ lb., 15c; lb., 40c, postpaid. By express or freight, lb., 30c; 5 lbs. @ 25c.

I have lived here eight years and never saw such a miserable, backward spring as the last one, but I can cheerfully write you that I have an A Number I garden, Every seed grew, and I have the finest vegetables in this locality, both as to qua'tty and quantity. (Signed) S. M. WARMAN, Sandstone, Minn.

The Kentucky Wonder Melon was a complete surprise. From one ounce of seed have picked half a wagon load, some of which weighed 40 lbs., and more yet on the vine. It beats anything I ever sow E. E. BALDWIN, Ada, Kansas.

The seeds you sent us did finely. The Tuberoses are in bud. Your Early Minnesota Tomatoes are the finest I ever ate, and they ripen so early.

(Miss) LILLY TUCKER, Bangor, Me.

The seeds I ordered of you last spring have proven to be first-class in every particular.

(Signed) NEILS R. THAGE, Livingston, Mont.

FOR SUGAR BEET, SEE PAGE 7.

CARROTS FOR STOCK.

IMPORTANT.—Owing to the large size which these Carrots attain less seed is re-quired to the acre than of other sorts—2 lbs. per acre being sufficient.

Northrup, King & Co.

No one who feeds stock can afford to be without Carrots. I feed each year Mangel Wurzel, and Ruta Baga, and regard them very highly; but Carrots I consider indispensable. I increase my acreage of Carrots each year, and believe I secure better proportionate results from their use than from anything else I feed. from anything else I feed.
As to varieties, nothing can be

better in point of quality and great productiveness, than your VICTORIA (yellow), and MASTODON (white). I

use them both, and have never yet seen them equalled.
In this connection I am glad to express the unqualified satisfaction your seeds have given me in the many years I have traded with you.

Very truly yours, N. P. CLARKE.

SPECIAL OFFER.

In order that our customers may test the comparative merits of these two grand Carrots, we will send to any address, postpaid, to any part of the United States, one pound each of the MASTODON and VICTORIA Carrots for \$1.50. Eight cents per pound can be deducted if sent by express or freight at purchaser's expense.

MR. N. P. CLARKE,

Proprietor of the Meadow Lunn Stock Farm,
St. Cloud, Minn.

Mr. Clarke's celebrated stud of Clydesdales supplied the Sweepstake winners and nearly all the championship winners at the World's Columbian Exposition.

N. K. & Co's MASTODON Carrot. This is the heaviest cropping Carrot grown, yielding more tons to the acre than any other sort. The flesh is white, crisp, solid and very sweet in flavor. It is a vast improvement on the white and green Belgian sorts which have been such favorites in the past, as it is not only much more productive but vastly easier to handle. The roots are short and very heavy at the shoulder, rendering them easily harvested. An important feature, also, is that they do not easily break in pulling or storing. Too much can scarcely be said of their size and great productiveness. The roots frequently measure 15 to 20 inches in circumference, and 18 to 25 tons to the acre is not an extravagant statement as to the yield. Large Pkt. 10 cts; ½ lb. 30 cts; ½ lb. 50 cts; 11b. 90 cts; 5 lbs. \$3.75, by mail, postpaid.

N. K. & Co's VICTORIA Carrot. This is the largest and unquestionably the heaviest

quired to the acre than of other sortes—2 lbs. per acre being sufficient.

N. K. & Co's VICTORIA Carrot. This is the largest and unquestionably the heaviest form of Orange or Yellow Carrot known. The roots are remarkably fine, very symmetrical and of excellent quality, possessing high feeding properties. It is a heavy cropper on all soils, but especially adapted for strong or rich land. It grows fully half as much weight again per acre as the ordinary varieties, and as the roots grow more above the ground, it is much easier to gather the crop. This grand variety is sure to suit every one who grows it. Large Pkt. 10 cts; ¼ lb. 30 cts; ½ lb. 50 cts; 1 lb. 90 cts; 1 lb., 50 cts; 5 lbs. \$2.00, by mail, postpaid.

Yellow Belgian. Similar to the white, but yellow in color. Large Pkt., 5 cts; ¼ lb. 20 cts; ½ lb. 30 cts; ½ l

"THE FINEST CARROTS I EVER SAW."-JACOB GINTZ, Huntington, Ind., writes: "Your Mastodon are the finest I ever saw. I had several weighing 3½ lbs.
"SIMPLY GRAND."-"Your Mastodon carrots are simply grand as are also the Victoria. Dwarf Essex Rape is extra good and also your Early Minnesota sugar cane. I am well pleased with your seeds."-GEORGE ALLEN, Allerton, Ill.

"FIRST PRIZE IN NORWAY."-" My cousin in Norway, to whom I sent some Carrot Seed from your house, writes me that he took first prize at their fair with the Victoria Carrot, and that they attracted great attention on account of their size and solidity."-NILS MICHELET.

SUGAR BEET.

Klein Wanzlebener and Vilmorin's have thus far proven most successful for this country. Our stocks of these two celebrated sorts are known as "Elite" Strains, meaning choice; select. This Elite seed is grown only from roots, (each of which is analyzed) which show the highest percentage of sugar and co-efficient of purity

The Elite strains are the only ones that should be planted by those wishing to grow high grade sugar beets.
Vilmorin, Elite. This beet is the result of thirty-five years of methodic and persevering selection. In black soils, rich in organic matter it gives better results than any other variety. It is extremely rich in sugar, thousands of analyses showing that the percentage of sugar which can be obtained from this variety, is about sixteen. Its average yield may be stated as from 12 to 16 tons per acre. Pound 45c; postpaid. By express or freight,
Lb. 35c; 5 lbs. @ 30c; 10 lbs. @ 25c; 100 lbs. @ 20c; bags included.

Klein Wanzlebener, Elite. This variety at the present time, has probably a wider cultivation than any other sugar beet. It may be distinguished from the Vilmorin by its brighter color and its lighter colored leaves, which are beautifully undulating, and scalloped about the edges. While not as a rule equal to the Vilmorin in saccharine richness, it is considerably more productive. Pound 45c; postpaid. By express or freight, Lb. 35c; 5 lbs.

@ 30c; 10 lbs. @ 25c; 100 lbs. @ 20c; bags included.

SUGAR BEET FOR STOCK FEEDING.

We can furnish ordinary seed of Klein Wanzlebener, Vilmorin, Lane's Improved, Imperial and French White Sugar at the following prices: Lb. 30c, postpaid. By express or freight, lb. 20c; 5 lbs. at 18c; 10 lbs. at 15c; 100 lbs. at 10c. Bags included. In ordering, state variety wanted.

NORTHRUP, KING & CO'S SEED OATS .- Heavy, Vigorous, Productive.

NORTHRUP, KING & CO'S LINCOLN OAT. An Agricultural Wonder. Its record has never been equalled. The LINCOLN OAT has an established, undoubted and fully verified yield of 817 bushels and 21 pounds from 7 bushels of Seed.

Obtain your seed direct from the introducers, and secure genuine stock.

Do not neglect the opportunity to secure the seed of this magnificent, unequalled Oat, at the present low price.

HARVESTING LINCOLN DATS

We believe the Lincoln Out to be the best ever introduced. The claims we made for earliness, freedom from rust and enormous yielding qualities when first sending it out, have been fully sustained on every point and from all sections. Hundreds of customers have written us that on account of its stiff straw, it stood up perfectly under weather that caused all other varieties to lodge. It is the best and most economical Oat for feeding, on account of its thin hull, heavy meat and soft nib. Price of Lincoln Oats: Per bu. of 32 lbs., 80 cts; 2 bush., \$1.50; 10 bush., \$6.00; 20 bush., \$11.00; 100 bush., \$50.00. Sacks included. Delivered to R. R. Minneapolis. Why plant unknown varieties or run out stock, when you can get true stock of Lincoln Oats from the introducer at these low prices.

N. K. & CO'S BLACK BEAUTY.

N. K. & CO'S BLACK BEAUTY.

We imported from W. H. Mold, the celebrated English Oat specialist of England, (whose American agents we are,) a few bushels of a very select and high priced variety of black oats which we have named N., K. & Co's Black Beauty.

While few black oats are grown in the United States, they take the preference in most European countries, and it is safe to say that in England, two bushels of black oats are grown to one of white.

There black oats are preferred to white, principally on account of their superior yielding qualities, but beside being fully equal to white oats in point of feeding properties, they possess another very valuable characteristic, in the unequalled stiffness and strength of straw. Nothing less than a tornado or a cyclone will lodge them, Mr. J. W. Nesbit, who grew these oats for us, on his farm in Hennepin County, Minnesota, says:

"All of my other oats lodged more or less, but these black oats stood up perfectly; the straw was as stiff as hazel brush. We took off from our three-acre field. seven large loads of bundles, about three times as much as any white oats we had."

We last year sold the Black Beauty oat by the pound only, and reports from customers who tried it in this small way were of a most gratifying character.

We this year offer it by the bushel not more than two bushels to any customer. Lb., 25 cts. by mail postpaid. By express or freight: peck, \$1.00 bush., \$3.00; 2 bush., \$5.00. Bags included.

NEW ZEALAND RUST PROOF.

NEW ZEALAND RUST PROOF.

This variety was introduced into this country by means of a small package sent some years ago by a traveler in New Zealand to a friend in Iowa. It is a white side oat with medium sized grain, heads are extra long, heavy and full, averaging about 100 grains each, grows taller than ordinary and is medium early, though several days later than the early round head varieties. Its great hardiness and the strength and

stiffness of its straw is remarkable. It stools out extra well and requires less seed per acre than most kinds. It does not rust and unlike all other varieties of side oats has never been known to lodge and instead or having a tendency to deteriorate it seems to improve each year as it becomes more acclimated. Lb., 20 cts. by mail post paid: by express or freight: peck, 30 cts. by mail post paid: by express or freight: peck, 30 cts. by mail post paid; by express or freight: peck, 30 cts.; bush., 80 cts.; 2 bush., \$1.50; 10 bush., \$6.00; 50 bush., \$25.00. Bags included.

WHITE RUSSIAN (Improved).

The original stock of White Russian Oats was really a capital Oat, and sprung immediately into great favor. Of late years it has become badly mixed and deteriorated, through not being properly grown. Largely through the efforts of a customer of ours in Dakota, we are able to offer the White Russian in its old time purity. It is a well established fact that the true White Russian is as nearly rust proof as any Oat can well be, and we are confident that many will hail its re-introduction with satisfaction. Lb., 17 cts., by mail, postpaid. By express or freight: peck, 25 cts.; bush., 75 cts.; 2 bush., \$1.40; 10 bush., \$5.50; 20 bush., \$10.00. Bags included.

EARLY ARCHANGEL.

The original stock of this Oat was obtained from Archangel, a hamlet in the north of Russia, and since Its introduction to this country has been grown with great success. It has proven itself to be absolutely the earliest oat yet introduced; it is a heavy yielder, does well on light soil, and is a most satisfactory Oat in all respects. Its principal attraction is its extra earliness; and by this quality it escapes many of the ills which Oats are heir to. The straw is stiff, well glazed and erect. The grain itself is plump, heavy, exceedingly white, and of excellent feeding quality. The seed we offer is of our own growth from the original stock. Lb., 17 cts., by mail, postpaid; By express or freight: peck. 30 cts.; bush., 90 cts.; 2 bush., \$1.75; 10 bush., \$7.50. Bags included.

SPRING WHEAT.

PRICES. We are obliged to ask a considerable advance over the market price for our HIGH GRADE SEED WHEAT, as there is a very much larger cost attached to its production and preparation than any one who has not had the experience could possibly appreciate. Space does not permit of going into details, but, as a matter of fact, the prices named below for the larger quantities represent but a slight advance over the actual cash outlay to us.

We believe that farmers who want to change their seed will find it very much to their advantage to se-

cure enough, at least, to give them a start.

To those who do not care for the pedigree, or highly improved stock, but want simply good, healthy, sound and reasonably clean wheat, we would state that, Minneapolis being the largest wheat receiving city in the United States, we are in position at all times to select, from the hundreds of cars which are daily arriving, excellent lots of either Fife or Blue Stem, and which we will sell either in car or less than car lots, at a slight advance over the prevailing market price. Will be glad to send samples and prices upon application.

a slight advance over the prevailing market price. Will be glad to send samples and prices upon application. Pillsbury Fife Spring Wheat. We consider this to be the best and purest stock of Fife wheat obtainable. Great pains has been taken in its selection. Our stock grades No. 1 Hard and is perfectly sound and healthy, Lb., 20c, postpaid. By express or freight, peck, 60c; bu., \$1.75; 2 bu., \$3.25; 10 bu., \$15.00; 50 bu., \$70.00. Saskatchewan Fife Spring Wheat. Noted for its great productiveness, earliness, vigor and freedom from smut and disease. This wheat has become so well known as to render extended description of it unnecessary. We first brought it to the attention of the trade in 1834, and it has well sustained the claims then made for it, as the earliest and healthiest Spring Wheat. Lb., 20c, postpaid. By express or freight, peck, 50c; bu., \$1.60; 2 bu., \$3.00; 10 bu., \$14.00; 50 bu., \$65.00. Bags included.

Velvet Chaff Blue Stem Spring Wheat. A distinct variety from all other spring wheats. The stem, just below the head, when green, has a beautiful blue bloom on it, similar to the bloom on a grape, and which can be removed by passing the finger over the stem. This bloom disappears as the wheat ripens, and the stem and straw assume a beautiful golden yellow hue, and entirely free from rust. Earlier than the Scotch Fife. The kernel is of the hard variety, similar to Scotch Fife, more productive, o ne of the best spring wheats for milling. Lb., 20c, postpaid. By express or freight. peck, 50c; bu., \$1.60; 2 bu., \$3.00; 10 bu., \$14.00; 50 bu., \$65.00. Bags included.

SEED BARLEY.

N., K. & Co.'s Highland Chief Barley. This is a two-rowed, very productive, vigorous grower, less likely to be damaged by wet than most other kinds. It usually weighs quite 50 lbs. to the measured bushel, and is the largest berief and handsomest barley grown. Price, lb., 25c, postpaid. By express or freight, peck, 50c; bu., \$1.75;

est berried and handsomest barley grown. Price, 1b., 25c, postpaid. By express or freight, peck, 50c; bu., \$1.75; 2 bu., \$3.00; 10 bu., \$13.00.

New Beardless Barley. All Barley growers have experienced the annoyance occasioned by the chaffing and sticking of the beards while threshing. This nuisance has been overcome in the New Beardless Barley, which is entirely free from beards. This barley is six-rowed, the straw grows to a good height, is stiff and strong, and does not readily lodge. The heads resemble smooth, wheat, with the exception of a small duck bill on the point of each grain. This comes off readily in threshing, leaving the threshed grain looking like any other white barley. Price, 1b., 20c, postpaid. By express or freight, peck, 50c; bu., \$1.50; 2 bu., \$2.50; 10 bu., \$10.00. Bags included.

Manshury Barley. This is the best six-rowed barley we ever grew or ever saw. Lb., 20c; 31bs. 50c., postpaid. By freight or express, peck, 40c; bu., \$1.00; 2 bu., \$1.50. Bags included Black Hulless Barley. We have sold a good deal of this barley during the last 15 years, and it has given most excellent satisfaction as a feeding barley. We strongly recommend the White Hulless in its place, but as many will be reluctant to believe that anything can be better than the Black Hulless, we still offer it. Lb., 20c, postpaid; peck, 40c; bu., \$1.25; 2 bu., \$2.00; 10 bu., \$8.50. Bags included.

Don't miss White Hulless Barley. See last cover page.

AMES, Neb., Dec. 20th, 1897.

NORTHRUP, KING & Co.: All the seeds we have bought from you have given tire satisfaction, and we expect to do more business with you in the future than in past.

R. M. ALLEN, General Manager.

MR. R. M. ALLEN.

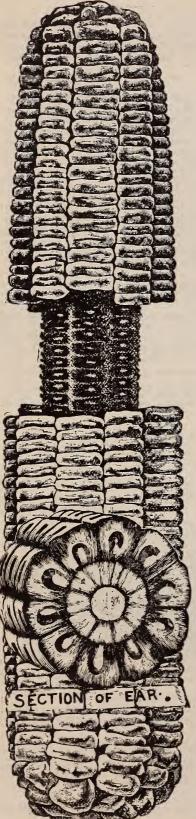

General Manager Standard Cattle Co., Ames, Neb.

The accompanying illustration is a scene at the feeding station of the STANDARD CATTLE COMPANY, AMES, NEB.

This farm consists of 7.250 ACRES. At present writing (Dec, 20th), with EIGHT THOUSAND cattle on hand, this company is a feeding 3,500 bushels of grain and about FIFTY TONS OF HAY and CORN STOVER DAILY.

Mr. Allen, the General Manager of the Company, is a recognized authority on cattle feeding in this country, and his views and suggestions are widely sought. With notable generosity and public spirit, Mr. Allen places at the disposal of inquirers the valuable results obtained from his large experience and numerous experiments. Mr. Allen is also deeply interested in Sugar Beet Culture. He is President of the American Sugar Growers' Society and President of the Nebraska Beet Sugar Association.

Mr. Allen has grown as high as 560 acres of SUGAR BEET in a single year. Try Sugar Beets. (See Page 7.)

Mr. C. W. Sutton, Hillsboro, N. D.

Hillsboro. N. D., Dec. 10, 1897. Northrup, King & Co., Minneapolis, Minn.

GENTLEMEN: — After purchasing seeds of you for more than ten years. and finding them always of the best quality, I wish you to know that I recognize and appreciate the great advantages that I have reaped in being able to obtain such reliable seeds. I wish particularly to make mention of the Mercer Corn, that I first obtained from you about eight years ago, and have raised ever since, greatly to my advantage and satisfaction. Always testing my own corn before planting, I have sometimes found that only a small percentage of it would grow. When I have sent to you for seed, that in every instance has proven to be reliable, I should like to know your secret in being able to always

ys furnish seeds that will grow.
Yours truly, C. W. SUTTON.

There is no man owning buildings but who sleeps more soundly at night from knowing that they are INSURED Farmers who plant our TESTED MINNESOTA GROWN

SEED CORN are, to a great extent,

going to catch his corn. Five to ten

days in the latter part of the season are very often CRITICAL DAYS.
This anxiety and risk can be greatly lessened by planting OUR MINNE-SOTA GROWN SEED A VAST AMOUNT OF MONEY would be saved

AMOUNT OF MONEY would be save up to the country each year if farmers would plant seed grown as FAR NORTH AS POSSIBLE.

As the Originators or Introducers of nearly all the Standard Early Varieties

of Seed Corn in use to-day, we consider that we may justly claim to be HEAD-QUARTERS for Northern Grown Seed Corn, that is NORTHERN GROWN.

Those are anxious days for the farmer when, with a good crop in sight, he is wondering whether early frosts are not

INSURED.

"The INHERITED QUALITY OF CORN to YIELD HEAVILY or POORLY, all comes in the TEN POUNDS MORE OR LESS OF SEED PLANTED. W. M. HAYS.

Does it pay to plant mixed, run out Corn from crib when an investment of a few cents an acre will secure selected vigorous stock of your favorite variety?

It will be noticed that we list not only early varieties, but all the best late sorts, like the Leaming, Champion Pearl, etc., these sorts having been grown as far north as they will ripen thoroughly. We wish to impress on farmers living in Illinois, Nebraska, etc., that by planting our Seed, of LATE sorts, they will be able to secure their crops earlier than could possibly be the case with seed grown farther south.

Prof. W. M. Hays. 90

A RECOMMENDATION. OUR CORN IS TESTED. We do not, however, feel like losing an opportunity of strongly urging our customers, WHEREVER they may purchase their seed, to TEST IT BEFORE PLANTING. It is but little trouble to try a few seeds in earth, and in this way the responsibility can be placed where it belongs.

N., K. & CO'S MINNESOTA KING CORN. (Yellow Half Dent.) We regard this corn (introduced by us in 1889) as the most valuable early Corn ever sent out. There are varieties that under exceptionably favorable circumstances will yield as much, but year in and year out, through fat years and lean years, there is, we believe, no sort that will do as well. It seems to possess a faculty of growing right along and making a crop during weather and under conditions that would ruin other varieties. We do not know of any good reason why this should be so, but not only is this our own experience, but we have received like testimony from hundreds to whom we have sold it; the universal expression being that for ability to endure extremes of heat and cold, flood and drought it has no equal. In appearance the Minnesota King is remarkably distinct, being a half yellow dent, the kernels are very broad and of an extremely rich golden color. The ear is of good size, eight rowed, cob small. Large pkt., 10 cts.; lb., 25 cts.; 3 lbs., 60 cts.; postpaid. By express or freight, peck, 50 cts.; bushel, \$1.75; 2 bushels, \$3.00; 10 bushels, \$13.50; bags included.

NOTE,—This corn was introduced by us several years ago, and although each season we have anticipated the large sale which it has met by what we considered liberal provisions, we have never as yet been able to supply the demand, having returned money yearly to late purchasers.

Early varieties of Seed Corn, particularly the "flint" sorts, are scarce this year. Purchasers will do well to secure their seed early. They will also do well to remember that an expenditure of a FEW CENTS extra to the acre for seed may mean a good many dollars in the HARVEST, and perhaps the saving of the ENTIRE CROP.

"A NORTH DAKOTA EXPERIENCE."

NORTHRUP, KING & Co., Minneapolis, Minn.:

DURBIN, NORTH DAKOTA, Aug. 2d, 1897.

GENTLEMEN: In reply to yours, July 29th, as to the satisfaction given by seeds bought of you last spring, I take great pleasure in reporting ENTIRE SATISFACTION.

Of the 60 bushels of seed corn, mostly Minnesota King, bought of you for and planted by myself and neighbors, I HAVE NOT HEARD A SINGLE COMPLAINT. This corn was ordered in several different lots at different times. I have talked with those who planted the greater part of it and all report ENTIRE SATISFACTION. The cold, wet and frosty planting season of 1897 will long be remembered by corn planters, owing to the great and unusual trouble with seed corn throughout the Northwest, and YET YOUR SEED STOOD THE TEST here in the cold Red River Valley of the North, and when that is said nothing further need be said in its favor.

The 4 qts. each of 4 varieties of garden peas were very fine. Could not be more perfect in every way. I was equally well pleased with all of the other garden seeds received from you.

Yours truly, L. W. SCOTT.

rreignt peck, 50c; bu., \$1.40; 2bu., \$2.50; 10 bu., \$10.00. Bags included.

Smut Nose Flint. A yellow flint corn blazed with red at end ofear. Ears are large and round. This is a very early variety, and a great favorite in many localities. Our stock is very fine. Large pkt., 10c; lb., 20c, postpaid. Peck, 50c., bu., \$1.75; 2bu., \$3.00; 10 bu., \$12.50. Bags included. University Number Thirteen. Prof. Hays, the widely known agriculturist of the Minnesota State Experiment Station, has for some years past been conducting a series of experiments with many kinds of corn, having particularly in view the selection of an early variety that would give larger yields than any at present known. University Number Thirteen was the variety finally selected for dissemination. Prof. Hays does not claim any fancy qualities for University Number Thirteen. In fact, he states that it has not been selected rigidly to a type, in appearance, as that would have interfered, somewhat, with the selection for large yields and profits. The experience of the two years following the introduction of this corn has fully demonstrated its ability as a producer. It is a full Yellow Dent 16-rowed variety, kernels packed closely on the cob. Not as early as our Dakota Dent (which is of much the same type), but highly recommended for planting south of St. Cloud, Minn. Large pkt., 10c; 10c, 20c, postpaid. Peck, 50c; bu., \$1.50; 2 bu., \$2.50; lou., \$1.00.

Try our TRIUMPH FLINT CORN. (See page 11). A true 80 Day Corn.

IMPROVED MASTODON CORN.

IMPROVED MASTODON CORN.

In the celebrated American Agriculturist Corn Contest, Mastodon Corn outylelded by far every other variety of Yellow Corn. Affred Rose of Yates County, N. Y. raised on one acre 15,898 POUNDS of CORN ON THE EAR which made 213 BUSHELS of SHELLED CORN. The originator states: "The Early Mastodon corn, named Mastodon because of its large ears, has been brought to its present standard by careful selection. The seed trade and large growers of field corn have for many years been anxiously inquiring for a large-cared, yet early Dent Corn, and to supply their wants I have for years been studying it up and until I got up this corn was not fully satisfied. Many sorts have been tried and found wanting. In the Mastodon your customers will find a high-bred corn, which will please them. I claim for this corn the largest number of rows on cob, and the deepest, longest grains of any corn ever originated. It grows very rapid, strong and rank, at a medium height, and will out-yield any corn ever grown in this section. You cannot too highly recommend this corn to your customers. I have grown thousands of bushels of Golden Beauty, and the Mastodon is from three weeks to one month earlier, growing side by side and planted the same week; and again Mastodon Corn is from one week to ten days earlier than any Leaming Corn grown. Price for Mastodon Corn: Large Pkt., 10c; 1b., 20c, postpaid: by express or freight, peck, 50c; bu., \$1.25; 2 bu., \$2.00; 10 bu. \$8.50. Bags included.

NOTE. While Mastodon Corn has thoroughly established itself as the earliest of the large oared varieties, and is early as compared with Golden Beauty, Leaming, and other standard late sorts, we do not as yet recommend it for general planting planting north of latitude 43. We more to be able to recommend it for general planting as far north as latitude 45. Meantime, we hope as many as possible of our customers in the north, will try a small quantity and report their success.

IOWA GOLD MINE CORN.

This is a fine new variety. It is early, ripening only a few days later than the Pride of the North; ears are of good size and symetrical; color a bright golden yellow, as handsome as a twenty dollar gold coin just from the mint: grain is very deep; cob small: and therefore dries out very quickly as soon as ripe. Price, lb., 20c, postpaid; by freight or express, peck, 40c; bu.. 1.25; 2 bu., \$2.00; bu.. \$8.00. Bags included.

STANDARD LATE VARIETIES.

Golden Beauty (Yellow Dent). The largest Grain and handsomest yellow dent corn in cultivation; the ears are large, of perfect shape, and in every way present as perfect a type as could be desired; has from ten to fourteen rows, and fills out well to the end of the cob; grows eight to ten feet high. Not recommended for the Northwest, but for the Middle and Southwestern states. Sample sent on receipt of stamps for postage. Large Pkt., 10c; lb., 20c, postpaid; by express or freight, peck, 40c; bu., \$1.00; 2 bu., \$1.75; 10 bu., \$7.50. Bags included. Improved Leaming (Yellow dent). Ears of good size, cob red and small, with a deep large grain of bright yellow. It is a strong grower and produces well on light or heavy land where other varieties of yellow dent would not thrive. Large Pkt., 10c; lb., 20c, postpaid; by express or freight, peck, 40c; bu., \$1.00; 2 bu., \$1.75; 10 bu., \$75c. Bags included.

Champion Pearl (Whitedent). A pure white dent corn, exceedingly heavy, very compact, very prolific; will grade No. 1 White in any market; can be planted thicker than large corn and bear full sized ears; it stands storms and drouths well. Large Pkt., 10c; lb., 20c, postpaid; by express or freight, peck, 40c; bu., \$1.00; 2 bu., \$1.75; 10 bu., @ 75c.

FODDER CORN.

FODDER CORN.

STOCKMEN, DAIRYMEN and others using FODDER CORN should place their orders EARLY, so that they can secure it at the low prices, test it and have corn on hand that they KNOW WILL GROW when ready to plant.

From one-half to two and one-half bushels are required to the acre. It may be planted in hills, drills or broadcast. THE CLOSER IT IS PLANTED THE FINER THE FODDER. Often four bushels are sown to the acre; this, in our judgment, is too much, as by such dense growth it is deprived of sun and air. Such fodder, if fed before drying is watery and washy, and when dry is light and chaffy, in neither case containing much nutriment.

tery and washy, and when dry is light and chaffy, in neither case containing much nutriment N. K. & Co. Giant Fodder. In proportion to the quantity of leaf this variety has a smaller stalk than any other fodder corn known to us. In growth it is very tall and leafy, and yields an immense quantity of fodder of excellent quality. The B & W., Soo, and other well known varieties of fodder corn grow just as tall and often throw out leaves that are just as large, but the extraordinary productiveness of the Giant Fodder corn arises from the closeness of the joints, and as leaves are thrown out at every joint, the result is an increased yield of fodder over every other variety with which we are acquainted. Lb., 20c, postpaid; by express or freight, lb., 10c; peck, 30c; bu., 85c; 2 bu., 1.60; 10 bu., @ 75c. Bags included.

Red Cob Fodder. In habit of growth it is very similar to the Giant. It has been before the public for some years and undoubtedly meets with the largest sale of any fodder corn. Lb., 20c, postpaid; by express or freight, lb., 10c; peck, 30c; bu., \$1.50; 10 bu., @ 70c. Bags included.

Elephant Fodder Corn. This is a yellow seeded, large growing, leafy southern variety, selected solely with a view of producing the largest yield of fodder at the lowest possible cost. We have grown this in large quantities and the very low price and splendid quality should cause it to sell quickly. Price, bu., 60c; 2 bu., \$1.10; 10 bu., @ 50c. Bags included.

Evergreen Sweat Fodder Corn. It is an underlich feet that there is better feeding.

did quality should cause it to sell quickly. Price, bu., 60c; 2 bu., \$1.10; 10 bu., © 50c, Bags included.

Evergreen Sweet Fodder Corn. It is an undeniable fact that there is better feeding quality in one ton of Evergreen Sweet Fodder Corn than in a much larger quantity of any other variety. The reason is evident from the fact that all sweet corn possesses very much more sugar than the field sorts, and as sugar is the most important constituent, it necessarily follows that the corn possessing this in greatest quantity is most valuable. It does not, however, yield as largely as the above named sorts. Lb., 20c, postpaid; by express or freight, 1b., 10c: peck, 50c; bu., \$1.75; 2 bu., \$3.00; 10 bu., @ \$1.25.Bags included.

Fodder Corn.

POP CORN.

DWARF ESSEX RAPE.

We were the first Seed House in America to bring Dwarf Essex Rape prominently forward as a desirable and economical Pasturage for Sheep. Following Professor Shaw's first bulletin on the subject written while he was connected with the Canadian Department of Agriculture at Guelph, Ont., we arranged for a quantity of the seed of the True Dwarf Essex Rape with a grower of Essex County, England. Every year since then we have had our seed from the same Source. We pay a good price for it. We can buy it for a good deal less elsewhere, but it has always given satisfaction and has stood the test. For this reason we are not able to make always as low a price on Dwarf Essex Rape as some of our competitors, but while many other houses have had trouble with their Rape Seed, ours has always been satisfactory and proven true to name. We are led to make this statement from the fact that many in seeing or sending for our price cannot understand why our prices, so low on most everything, are sometimes higher on Dwarf Essex Rape. A few cents extra per acre may make a GOOD MANY DOLLARS DIFFERENCE IN THE CROP.

DWARF ESSEX RAPE,"-Do They Like it?" From a Photograph taken at the Minnesota State Farm.

DWARF ESSEX RAPE is an annual, bearing a close resemblance in leaf and stalk to the rutabaga, but both leaves and stalk are more numerous in the Rape plant, and of a taller habit of growth. It is a pasture plant which may be eaten off by any kind of live stock, but it is preminently fitted to furnish pasture for sheep and swine. A good crop will furnish at least 12 tons of green food per acre and its nutritive value is nearly twice that of clover. One acre of well grown Rape will furnish pasture for ten to twenty head of sheep for two months, and in that time it will fatten them in good form for the market, Dwarf Essex Rape thrives best on a good soil, rich in vegetable matter. Slough lands are excellent. cellent.

cellent.

This plant may be grown successfully in the following ways, viz: 1. In the early spring to provide pasture for sheep and swine. 2. In June or July on well prepared land to provide pasture for sheep. 3. Along with grain, using 2 lbs. of seed per acre to provide pasture for sheep after harvest. 4. Along with peas, oats, clover seed, to provide pasture for sheep, and to get a "catch" of clover. 5. Along with corn drilled in broadcast to provide pasture for sheep, and to get a "catch" of clover. 5. Along with corn drilled in broadcast to provide pasture for sheep. 6. In corn, sowing the seed with the last cultivation given to the corn. 7. Along with rye sown in August in sheep pasture. When rape is sown broadcast, 5 lbs, of seed per acre will suffice. When sown in rows, say, is now being

30 inches apart, and cultivated from 1 to 2 lbs, will be enough. It is now being grown in the Northern and Middle States from the Atlantic to the Pacific. The day is not far distant when it will be grown extensively as a pasture for Swine in all the Northwest. Millions of sheep and lambs will be fattened on it in the United States. Our stock is the true Dwarf Essex, imported by us direct from Essex County, England. Several other varieties are sold but they have not proven satisfactory. Price. lb., 30c, postpaid; by exp. or frgt., lb., 20c; 10 lbs., @ 15c; 100 lbs. @ 11c; 500 lbs., @ 10c.

SORGHUM.

EARLY MINNESOTA SUGAR CANE. A much Neglected, a Highly Valuable Plant. Notwithstanding its great adaptability as a food for live stock, it is only quite recently that the real value of Sorghum (or sugar cane) has attracted general attention. In the Northwest, its great merit is not at all appreciated, and we wish to call the attention of farmers everywhere to the great value of Sorghum as a pasture and fodder crop, and to the particular advantage to be gained in using our Selected Minnesota grown Set d in place of any other kind. Sorghum may be made to furnish the principal provender for Cattle, Horses and Mules from August until the following spring. As a summer pasture for Sheep, a wide field is likely to be opened up for it. As a solling food for Swine it is most excellent, and the seed furnishes a splendid food for fowls. It can be profitably grown everywhere, from the extreme north to the extreme south, and on any ground adapted to the growth of corn. It grows right along through the severest and most prolonged droughts, so that a good yield may be expected from suitable soils in any seasons after the plants have secured a good start.

As PASTURE. It is grown with excellent results, and springs up quickly after being fed or cut. Care, however, should be exercised in feeding it green, for while some growers state that no ill results follows its free use, others claim that, like clover, it will produce bloating.

As FODDER. It beats everything. One correspondent writes us: "For winter feed, the most economical thing we know of. We have taken off 37 full loads (about 50 tons) of half-cured fodder to the acre." When fed as a whole ration it has a tendency to whiten the milk, but not the butter, as does Corn.

(about 50 tons) of half-cured fodder to the acre." When fed as a whole ration it has a tendency to whiten the milk, but not the butter, as does Corn.

About thirty pounds of seed is required to the acre. Use a wheat drill set to one bushel. Stop every other hole. When the plants are about 8 inches high, harrow with a heavy two-horse harrow.

For soiling, it may be cut as needed. For fodder, cut soon after the bloom comes out on the heads, leave for two or three days on the ground, then put up in shocks of about one load each,

THE SEED. No other variety can, in our estimation, compare with our Improved Early Minnesota, either for sugar or fodder purposes. It is unusually rich in saccharine matter, is vigorous and much earlier than any other variety. Price, per lb., 25c; postpaid, by express or freight, lb., 15c; 10 lbs., @ 10c; 100 lbs., @ 6c; bags included.

Early Minnesota Amber Cane.

Prices Subject to Market Fluctuations.

g---------Thirteen years age we were severely criticised by one of the leading agricultural papers of Minnesota, as well as by many farmers, for advocating leaves of Field Pass in the Northwest. Since that time we have had be pleasure of seeing the paper in question become one of the most earnest and effective advocates of their largely increased use, and the still greater satisfaction of knowing that they have become a standard crop in many parts of the West and Northwest. They should, however, be grown even more largely than they are Those who have not grown them should do so by all means. Those who have tried them and been unsuccessful should try them again. They are a highly valuable crop. Feas are scarce and high in price this year.

and Northwest. They should, however, be grown aren more largest in this standard with the control of the contro

Sand or Winter Vetch (Vicia Villosa). Sometimes called the Hairy Vetch, This has proven to be the most valuable of all the Vetches. It succeeds well on nearly all soils, and thrives surprisingly on poor light land, and well withstands great extremes of drought, heat and cold. It may be sown either in the spring or fall, usually with Rye. It grows rapidly and is particularly valuable in sections where clover does not thrive. In the North it remains green all winter under the snow, and is invaluable for early pasturing or soiling. It is valuable as a fertilizer, being a great nitrogen gatherer. For hay, cut when commencing to pod. Fifty pounds of seed required to the acre. Large pkt., 5c; lb., 20c, postpaid. By freight, lb., 10c; 10 lbs. at 8c; 50 lbs. at 7c; 100 lbs. at 6c. Bags free.

Spring Vetches. Used for the same purposes as the Sand Vetch, but will not thrive on as poor soil, or withstand extremes of weather as successfully. Large pkt., 5c; lb., 18c, postpaid. By freight, lb., 10c; 10 lbs. at 7c; 50 lbs. at 6c; 100 lbs. at 5c. Bags free.

Kidney Vetchor Sand Clover, Perennial. Valuable for dry sands and poor soil. Sow 25 lbs. of seed to acre. Pkt., 5c; lb., 25c, postpaid; 100 lbs. at 10c. Bags free.

Sand Vetch.

MISGELLANEOUS FODDER AND FORAGE SEEDS.

If Wanted by Mail add 10 cents per pound for Postage.

AUSTRALIAN SALT BUSH. The many thousands of acres of alkali lands of the West may be made productive and profitable by planting Salt Bush. Cattle, Horses, Sheep and Swine eat it and thrive on it. This plant is not an experiment, it is a demonsneep and Swine eat it and thrive on it. This plant is not an experiment, it is a demonstrated SUCCESS. It was introduced into this country by the University of California, and already has proven a boon to stock raisers on the California ranges. It flourishes where grasses and other forage plants will not grow, and furnishes enormous quantities of nutritive food for stock and remains green all winter. Single plants grown on the worst alkali lands have reached a diameter of 16 feet in one season. It succeeds everywhere, and there seems to be no question but that it will in time eliminate alkali from the ground, rendering it suitable for other crops. Prof. Tower states that its nutritious strength is nearly equal to that of Alfalfa. Large pkt., 10c; lb., \$1.50.

Test Australian Salt Bush this Season, one pound of seed will plant an acre. Sow after the past. Mix the seed with ten times its bulk of loam, sand or land plaster, and sow broadcast, after which cover lightly with a brush harrow or roll lightly. The seed germinates quickly, and the plants will soon take possession of the ground. Or the seed may be sown in a hot-bed, cold-frame, seed-boxes, or in a protected garden-bed, and the seedlings transplanted when two inches high, 7 to 8 feet apart. If the weather is dry when planting, supply a little water to each plant. Large package, 10c; ¼ pound, 60c; 1 pound, \$1.75, by mail postpaid. Deduct 10c a pound if wanted by express or freight.

Although our own test showed a good growth, we had nine complaints from customers to whom we sold Australian Salt Bush last season, that it did not germinate. We referred these complaints to the collector who furnished us the seed, and he states that without doubt the fault lay in covering the seed too deeply. He writes: "Advise your customers to prepare the ground thoroughly and cover the seed very lightly, and you may also say to them that Australian Salt Bush is a splendid and unqualified success."

	THOUGHD HEADED VALE We wish to call attention to Thousand Headed Kale as a			

THOUSAND HEADED KALE. We wish to call attention to Thousand Headed Kale as a valuable pasturage for crop of wholesome and nutritious food. It produces more food to the acre than any other, and sheep especially thrive wonderfully upon it. So far as we know, it has not been used in this country, but we do not hesttate to predict that in a few years it will be as popular as Dwarf Essex Rape. It is in England thoroughly established as a safe and profitable pasturage for sheep. The seed should be drilled in rows 20 to 30 inches apart, and plants thinned out so as to stand about 20 inches apart in the row, or the seed may be broadcasted, using 1½ lbs. to the acre. Large pkt., 10c; ½ lb., 30c; lb., \$1.00, postpaid.

GRASS AND CLOVER SEEDS.

We have adopted the above design as our Trademark, and for the protection of ourselves and our customers, have caused it and the word STERLING as applied to Seeds to be registered in the Patent Office at Washington.

We ask special consideration of the QUALITY of our Grass, Clover and Millet Seed. It may not be generally known that Northern Minnesota and Wisconsin grown Timothy and Clover Seed ranks the highest of any produced in the United States, and commands the highest price in the markets of this country and Europe. We have the best cleaning machinery obtainable, and exercise every care to assure a high degree of purity and germination. Any one who orders our best grades of Grass, Clover and Millet Seeds, may exercise the privilege of returning them at our expense if upon arrival and prompt test they do not develop a high percentage of growth, or fail to prove of satisfactory purity under microscopic examination.

MR. O. C. GREGG. Superintendent of Minnesota State Farmers'
Institute.

Lynd, Lyon Co., Minn., Dec. 10, 1897

Lynd, Lyon Co., Minn., Dec. 10, 1897

NORTHRUP, KING & CO.,
Minneapolis, Minn.
GENTLEMEN; — We purchased of you last spring some of your Grass Seeds, sold under the "Sterling brand." We made selections of them because we were assured that they were free from foul seeds, and had strong germinating power.
Our experience with them verified

they were free from foul seeds, and had strong germinating power. Our experience with them verified the recommendation you gave.
One of the dangers which grows out of the sowing of grass seed is that we are liable to get injurious weed seeds in such sowing. We had an experience with some in which we obtained the seed of the ox-eyed daisy, and had to hatch very closely in order to exterminate the little start which we then gave to that pest upon our place. The Seedsman who will furnish seeds of good vitality, as well as free from noxious weeds, is a valuable aid to good agriculture. We uable aid to good agriculture. We believe that your house proposes to maintain and further establish that reputation for HIGH GRADE SEEDS reputation for High GRADI Call that is needed in our Northwest. I am, very truly yours, O. C. GREGG.

OUR "STERLING" BRANDS.

The terms FANCY. CHOICE and PRIME by which the best grades of Timothy and Clover Seeds are usually known, vary greatly in different markets, and have become much abused by many seedsmen, who apply these terms indiscriminately to any grade of seed. For this reason we have established a grade of our own called STERLING, and we intend this grade to represent the best seeds possible to send out, both as respects PURITY and GFRMINATING POWER. We shall continue to sell Choice and Prime Grades, and they will be found Exactly as Represented, but the cost of using the best seed is so little more, that we urge purchasers to buy our STERLING PRANDS, and secure the best quality. The results will pay the difference many times over.

PRICES.

Prices on Grass Seeds, Clovers, etc., are very fluctuating. Those herein given are based on values the day this is written. So we reserve the right to send seed to the value of the money sent us, according as the market is higher or lower. If large quantities are wanted, it is always best to write for prices. Then there is sure to be no misunderstanding. Unless otherwise stated, our prices include Sacks, and free delivery to any railroad station in Minneapolis.

If any Grass or Clover Seeds are wanted by mail, add 10c per pound for postage,
Please note that we quote both by the 100 LBS, and BUSHEL.
In ordering, always state Grade wanted. 20 lbs., or more, supplied at the 100 lbs. rate.

CLOVERS.

MR. J. E. STORY

New Brighton, Minn., Nov 1st, 1897 NORTHRUP, KING & CO., Minneapolis, Minn Gentlemen: The Seeds I have had from you while Manager of Mr. J. J. Hill's North Oaks Farm, have been

North Oaks Farm, have been most satisfactory.

I wish to highly commend your Sterling Grades of Grass and Clover Seeds of which we used a large quartity. Farmers could well afford to pay three times as much for seeds as pure, as clean, as strong growing as these, than to take the ordinary grades as a gift.

I wish also to speak of your

I wish also to speak of your Minnesota King Corn It is a grand variety, early, a heavy yielder and an excellent silage sort.
Yours very truly,
J. E. STORY.

Mr. Story.has a great record as a farmer. As a young man, he won the Gold Medal, awarded by the Counties of Lannark and Carlton, for the best farm in these Counties. He was then made Superintendent of the Government Experiment Station of Ontario, Canada; from there, went as manager of the celebrated "Bow Park" farm, the "crack" farm of Canada, which position he held until he came to Minnesota to take charge of Mr. J. J. Hill's farm at White Bear Lake.

Bear in mind that prices on grass and clover seeds fluctuate greatly. It is always best to write for prices. If wanted by mail, add 10 cents a pound for postage. In ordering, always state Grade Wanted, 20 lbs. or more supplied at the 100 lb.

AUSTRIAN BROME GRASS .- (Bromus Inermus.)

This is the most promising grass that has yet been tried on the prairies of the West. It is very hardy, endures very low temperature in winter, and posesses great power to grow in dry climates. It is well adapted for hay or pasture. This grass comes up quickly in the Spring, makes a rapid growth, and after it has been cut for hay, makes abundant pasturage.

Prof. Shaw says: "This grass cannot be obtained too soon by the farmers of the Northwest."

We wish to call special attention to the quality of our seed. The large demand for this seed has resulted in a great deal of trashy, light seed being sold.

We offer two grades of this seed, "Sterling" and Regular. Our "Sterling" grade is the finest obtainable, the best and heaviest we have ever seen. By mail, postpaid, lb., 35c. By express or freight, lb., 25c; 100 lbs., \$20.00. 15 lbs. to the acre.

Regular. Is good seed but lighter, and does not show as good a test. It is fully equal, however, to the seed usually sold. By mail, postpaid, 30c. By express or freight, lb., 20c; 100 lbs., \$16.00. 20 lbs. to one acre.

Austrian Brome

CAUTION. Last season, owing to the great demand for Bromus Inormus, which early exhausted the supply of good seed obtainable in this country or Europe, several unprincipled seedsmen sent out Bromus Mollis, the seed of which resembles that of Bromus Inermus. but which is in growth and value but little better than a weed.

Our REGULAR grade of Bromus Inermus above quoted is in every particular equal to any we have seen sent out by other seedsmen, but our STERLING grade we unhesitatingly pronounce the finest, heaviest and purest Bromus Inermus obtainable anywhere, COMPARE SAMPLES.

Morthrup. Iking & Co's Clover Grass Mixtures.

FOR MEADOWS AND PERMANENT PASTURES.

MR. A. H. POEHLER; Treas. H. Poehler Co., Grain Commission Merchants, Minneapolis,

All authorities agree that for PASTURE and HAY, best results are obtained from the use of grass seeds IN MIX-TURE. The reasons are obvious: First-A NUMBER OF SPE-CIES will insure a much DENSER GROWTH than the same number of seeds of one or two species, and prove Less Exhausting to the soil, since they live to a large extent on different constituents. Second-Seasons that affect some grasses adversely are FAVORABLE to other sorts; so that with mixtures, a failure is PRACTICALLY IMPOSSIBLE, provided, of course, the seed is good, We take great pains in selecting grass seeds, in order to secure the HIGHEST GERMINATION, and mixtures are based on a full appreciation of the requirements of different soils for which they are intended.

MR. J. STRUDWICK. Supt. Mr. F. H. Peavey's Highcroft Farm.

"The permanent pasture mixtures you made up last Spring for forty acres of our Renville County farm made an excellent catch and is very thick on the ground. Although the original cost is greater, I belleve that such mixtures as these are, in the long run, VERY MUCH MORE ECONOMICAL and PROFITABLE than the VARI-ETIES ORDINARILY USED FOR PASTURES in the Northwest. Yours truly,

H. POEHLER COMPANY.

N., K. & CO.'S CLOVER GRASS MIXTURES .- We ask purchasers to observe that we are able to offer, at these very low figures. only from the fact that we make up large quantities before the commencement of the season, therefore nothing can be taken out. We cannot afford to add anything to the mixture, on account of the slight margin upon which we have figured. We shall be happy, however, to make estimates on any special mixtures desired by our patrons. Our recommendations for quantity to the acre is fixed on the basis of good fair seeding. The quan-lis by all means the best I have tity can, of course, be spread over more or less ground, as the case may demand. 25 lbs. supplied at the 100 lb. price.

The permanent pasture mixture you made up for Mr. Peavey's Higheroft Farm has done splendidly. It was a fine mixture and made a good catch.

During the sixteen years I have been in this country I have been trying to get such mixtures as are so successful and permanent in England. Yours yet seen.

Yours truly J. STRUDWICK, Wayzata, Minn-

FOR PERMANENT MEADOWS.

No. 1. For dry and high grounds, light soils. No. 2. For dry and high grounds, strong soils. No. 3. For moist grounds and rich soils. No. 4. For moist grounds, occasionally overflowed. No. 5. No. 10. For high and dry grounds, light soils. No. 11. For high and dry grounds, heavy or clay soils. No. 13. For moist grounds and rich soils No. 13. For top seeding to improve pasturage on low rich ground or marshes. No. 14. For orchards and shaded places.	22 20 12 20	14 14 14 12 14	10.50 10.25 10.75 9.25 11.80

The above are mixtures we can "stand by." We can make up lower priced mixtures if desired. Don't let the price stand in the way of your getting a good article. It is the cheap, fake grass mixtures that have brought discredit on grass and clover mixtures in this country.

PRICES SUBJECT TO MARKET CHANGES.

The name by which we have designated this Millet has been applied to emphasize the use to which it is now being largely put, as an economical and highly valuable food for stock, especially Hogs, and while it is one of the best varieties to grow on account of the ready sale with which the seed now meets in most millet markets, for Bird Seed and other commercial purposes, it is from the standpoint of its merits in raising and fattening swine that we give it prominence and urge its use. While recommended for all sections, its highest comparative

value will, of course, be found in those areas where corn cannot be safely or cheaply grown. In such localities HOG MILLET satisfactorily solves the problem as to the profitable raising of swine. Lb., 20c, postpaid; peck, 35c; bu.,

as to the profitable raising of swine. Lb., 20c, postpaid; peck, 35c; bu., \$1.00; 10 bu at 90c

N. K. & CO.'S GOLDEN WONDER MILLET. Heads eighteen inches in length containing 18,000 seeds are not rare. The average length of head is about fifteen inches. The yield is enormous. The stalk at butt measures about one-fourth of an inch. full of broad leaves, resembling those of corn, yielding 10 to 12 tons of fodder per acre, and as easily cured as clover hay. Lb., 20c., postpaid; peck, 75c; bu., \$2.00.

GERMAN MILLET. Those who grow Millet for hay will find the Southern grown German Millet the best variety for that purpose on account of its giving a ranker yet finer growth than the Northern grown Millets. Peck, 35c; bu., \$1; 10 bu. @ 90c. COMMON MILLET. Requires a dry, light, rich soil, and grows 2½ to 4 feet high, with a fine bulk of stalks and leaves, and is excellent for forage. For hay, sow broadcast, one-half bushel per acre, from May 1st to Aug. 1st. For grain, sow in drills, one peck to the acre, and not later than June 20th, Peck, 30c; bu., 80c; 10 bu. @ 75c. HUNGARIAN. A dark seeded variety, resembling in growth the German Millet, but being less rank, and possessing finer stalks. Peck, 35c; bu., \$1.00; 10 bu. @ 90c.

Vegetable Seeds.

EVERY VARIETY WE LIST IS GOOD. In making up our list of Vegetables it is our aim to include those only which possess REAL MERIT, and to describe and illustrate them TRUTHFULLY. Attention, too, is called to the fact that in leading sorts we mention the Number of Seeds to be found in our packets.

Bear in mind, please, that our Seeds are TESTED.

Remember that our PINT and QUART prices on PEAS, BEANS and CORN include payment of postage by us.

If wanted by express or freight with other seeds, postage may be deducted. ARTICHOKE SEED. (For Roots see page 25.) Large Pkt. Oz. 1/4 lb. Lb.

Green Globe. Grown for the unripe flower heads, which are highly esteemed by epicures...

ASPARAGUS SEED. (For Asparagus Roots see page 25.) Columbian Mammoth White. Gives immense yield of clear white shoots. A most distinct and valuable variety. The shoots remain white, without earthing or artificial blanching, as long as fit for use, and it can be depended upon to give 80 to 90 per cent of white plants from seed. Palmetto. Mammoth in size, even and regular in growth and appearance. Usually ready for market before other varieties. 8c 30c 80c \$3.00 10 30 1.00 .50 15 10 excellent...

BROCCOLL. White Cape. We consider this the best variety. Color creamy white. Can be grown where cauliflower makes an uncertain crop.

Purple Cape. Best variety for the North, being earlier than .50 40 1.00 30 BRUSSELS SPROUTS. Improved Dwarf. Produces on the stem small heads resembling miniature Cabbages. The sprouts are used as greens, and become very tender when touched by frost. Sow in May, and manage as winter Cabbage..

BEANS, DWARF, STRINGLESS, WAX PODDED. Our packets of Beans contain on an average about 100 Seeds. Large Pkt. Qt.

Early Aristook. The earliest white bean. Usually mature in 60 days. Productive. Fine quality. pkt., 10c; qt., 40c, postpaid. By express or freight, qt., 20c; bu., \$3.00. Try this splendid new Bean. Pkt. Pkt. 05c .. 05с

Your CALIFORNIA WONDER BEAN is the GREATEST YIELDER I have ever seen. I see that one of your customers grew 864 BEANS FROM ONE I HAVE JUST SHELLED THE BEANS FROM ONE STALK AND HAD 900 GOOD BEANS. L. R. CROCKER, Minn.

The California Wonder, or Improved Tree, is easily the heaviest yielding Bean known. It is a field variety. The Seed resembles the well known "Navy," and on account of its whiteness and small size commands the highest price in all markets. It has the additional merit of being pure stock. It is to us a source of constant wonder that Bean growers, otherwise intelligent, should plant mixed seed, as mixed stock always sells at from 25 to 50 per cent. less than straight stock. A few cents extra expended on the seed means many dollars in the crop. 12 quarts of the California Wonder Bean will plant an acre. Price, large pkt., 10c; qt., 40c; postpaid. By express or freight, qt., 20c; peck, 60c, bu., \$2.00; 10 bu. @ \$1.75.

For Mangel Wurzel, (Stock Feeding Beet), See Page 6. For Sugar Beet, (Finest Strains), See Page

WASHINGTON WAKEFIELD CABBAGE.

'First in Head! First in Market! First in the Hearts of Gardeners." .

(Early.) We introduced this Cabbage in 1893, at which time our stock was limited. We received so many letters of praise and congratulation regarding it, that it seemed as though every one who tried it must have written to make known their satisfaction. All Gardeners are so familiar with the Wakefield Cabbages that description is unceessary. The engraving shows the character of the Washington Wakefield, and it is perhaps sufficient to say we believe it leads all other strains of this popular variety in Earliness, Size of Head and Purity of Stock. Large pkt., 10c; oz., 30c; ½ lb., 75c; lb., \$2.50.

In 1897 Angus McDowell of Wausaukee, Wis., wrote us: "Your Washington Wakefield beats anything I ever saw in the cabbage title care. It will hereafter be my early and principal cabbage." In 1898 he writes: Your Washington Wakefield and Harvest Home are the two best cabbages that grow. The Washington Wakefield was two weeks earlier than the Lightning or Express, and heads as hard as the late sorts."

"Out of 972 plauts of the Harvest Home that I set out from a single packet of seed, not one plant failed to head."
"Any gardener giving your seeds a trial will surely order of you again."

"Any gardener giving your seeds a trial will surely order of you again."

"Your Washington Wakefield Cabbage is the surest header, and has the largest heads of any early cabbage ver handled. Your Model Cauliflower surpasses everything I have ever had."

(Signed,) HENRY JOHNSTON, Monarch, Mont. I ever handled.

"I want to let you know that the Washington Wakefield Cabbage surpassed any other variety of Early Cabbage we had here. We took the first to market July 15th. Receive my most sincere respects in promising you my full order for seeds next year."

JOHN ABEL, Schofield, Wis.

Our Packets of Cabbage contain on an average about 1000 Seeds. One ounce for a bed of forty feet will produce about 2000 plants.

In some important particulars, this is the most remarkable Cabbage yet produced. In fact, it well illustrates the truth that "merit will win," in that while it was introduced only about four years ago, it has already become the favorite sort with those who have had the true stock. The heads, which are very solid and deep, are of medium size, averaging about 8 lbs. in weight; in color they are entirely distinct; in point of quality they have no superior, and they keep better than any other sort, the heads being as solid and perfect when taken up in the spring as when put away in the fall. At that time no cabbage will sell beside them even at one-half the price. Large pkt. 5c; oz. 30c; ½ lb. \$5c; lb. \$3.00.

Mr. B. L. Grant of Hudson, Wis., writes: I am very pleased with your stock of Holland Cabbage. The seed for eight acres was from you; that for four acres was from another firm. Yours was splendid. The Cabbage on the other four acres was not good and they rotted very badly. I regard the Holland as the coming Cabbage. Shall plant twenty acres of it next year, and shall want your seed exclusively.

In the past twelve years I find I have bought from your house over 3,000 lbs. of Onion Seed, large quantities of Cabbage and other seeds, and they have always proven uniformly good, both as respects purity of stock and strong germination.

The Lupton. Considered by Mr. Lupton, the well known cabbage specialist, to embody all the points to be desired in a late cabbage. It is a selection from Excelsior Flat Dutch, and a little earlier. Color dark bluish green. Stem short and strong, heads large, but not coarse. An excellent keeper. Pkt. 5c; oz. 20c; ¼ lb. 50c; lb. \$1.75. Bridgeport Drumhead. Late, head large, very solid, good shipper. Pkt. 5c; oz. 20c; ¼ lb. 50c; lb. \$1.50. Louisville Drumhead. Popular in the South. Pkt. 5c; oz. 20c; ¼ lb. 50c; lb. \$1.50.

our Stocks. Northrup, King & Co.'s Selected Late Flat Dutch. A low growing variety, heads large, bluish green, round, solid, broad and flat on the top; an excellent fall and winter variety, and a good keeper. It is a sure header. Our stock has been grown from carefully selected heads, and we consider it superior to any other strain of Flat Dutch Cabbage on the market. Large pkt. 5c; oz. 15c; 1/4 lb. 35c; lb. \$1.25. Northrup, King & Co., Minneapolis, Minn. Gentlemen.—You ask me if I have any objection to your referring gardeners to me, as to the reliability of the seeds I have had from you. In reply would say that I not only have no objection, but, on the contrary, it will afford me very great pleasure if I can be of service to

you in this way. I have purchased the greater part of my seeds from

your house for the last fourteen years, and speak from long experience when I say they have given perfect satisfaction. Can one say more?

Yours very truly, (Signed) FRED BUSCH.

MR. BUSCH, who writes the above letter, is the most extensive Market Gardener in the State of Minnesota. He owns seventeen large greenhouses, having 75,000 feet of glass. His specialties are Cucumbers, Tomatoes, Radishes and Lettuce. These he sells not only throughout the Northwest, but ships largely to Chicago, St. Louis and other leading markets. The preceding statement from a man like Mr. Busch means a great deal.

Northrup, King & Co.'s Selected (late) Flat Dutch Cabbage. (Private Stock.)

CELERY, ETC.

Our Packets of Celery contain on the average about 6,000 Seeds .- One Ounce of Seed will produce about 3,000 Plants.

Kalamazoo. Named and introduced by us 1888, and we have never seen a better Celery since that time, when we sent it out as the best celery grown. Not a self-blanching variety, but well repays the slight extra labor in treating it. Perfectly solid, beautiful cream color.

CORN SALAD or Fetticus. Large	Round 5c 10c 20c	.40
CRESS. Curled or Pepper	5 10 15	.40
True Water Cress	5 30 80	3.0

CAULIFLOWER.
One Ounce of Seed will produce 1,000 Plants.

One Ounce of Seed will produce 1,000 Plants.

Northrup, King & Co.'s Model. Several years ago we received from Denmark a sample of cauliflower; the letter accompanying it claimed it to be a superior strain. We planted this in our trial grounds, and after comparing it carefully with all other early varieties, we concluded that it was fairly entitled to be called the best cauliflower on the grounds. The very earliest sort, while in solidity of head and purity of color we have never seen its equal. It is the best for early planting; best also for late planting on account of its close growing habit, which allows many more plants to be grown on a given area than of the late spreading sorts. Pkt., 20c; ½ oz., \$1.25; oz., \$2.00; ½ 1b., \$7.00; 1b., \$25.00. Try the Model Cauliflower.

"Your Model Cauliflower is the best in the world, and I had seed from several froms. I had Cabbage and Cauliflower in market before any one else, and that is saying a good deal."—WILLARD GOOD, Sundance, Wyo.

Henderson's Snowball. Excellent for both early and late planting. Grown from stock seed obtained from originators. Pkt., 15c; ½ oz., 60c; ½ oz., \$1.00; oz., \$1.75; ½ ₺., \$6.00; ₺., \$20.00.

Extra Early Dwarf Erfurt, Short stem. very fine stock. Pkt., 15c; ½ oz., 75e; oz., \$1.25; ¼ b., \$5.00; b., \$15.00. Early Erfurt. Pkt., 10e; oz., \$1.00; b., \$7.00.

Walcheren. Very late and hardy. Pkt., 10c; oz., 35c; ¼ \$\mathcal{D}\$\$1.00.

Autumn Giant, Large, late. Pkt., 10c; oz., 35c; ¼ b.. \$1.00.

Report of Cauliflower Test from Michigan Agricultural College:—"MODEL CAULIFLOWER the best of 12 varieties grown. Heads were large, compact and glistening white. Ripens before Early Dwarf Erfurt."

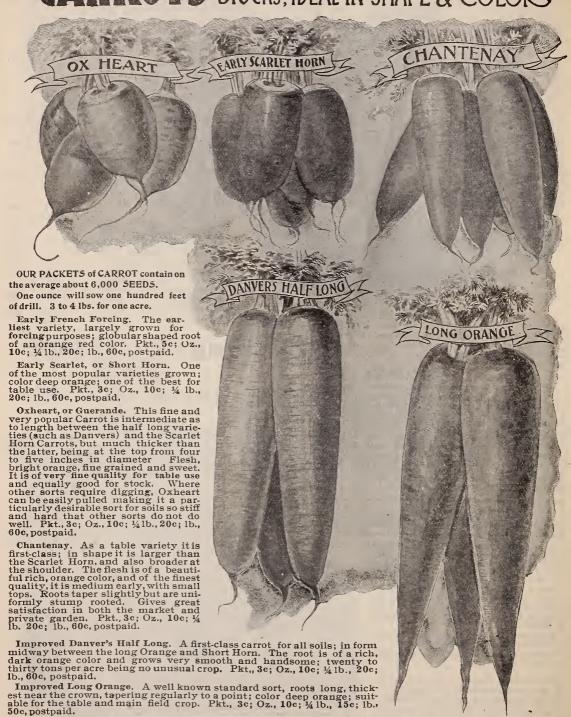

GOLDEN SELF-BLANCHING GELERY. N.K & CO'S. SPECIAL STOCK.

CAPPOTS 'NORTHRUP, KING & CO'S. EXHIBITION STOCKS, IDEAL IN SHAPE & COLOR

For Stock Feeding Carrots, See Page 7.

Our MASTODON (white) and VICTORIA (yellow) lead all other varieties. They are of IDEAL SHAPE. EASILY LIFTED FROM THE GROUND, FINE IN QUALITY and ENORMOUSLY PRODUCTIVE.

Everyone Welcomes the first Sweet Corn of the season, and there is a natural strife among gardeners to realize the excellent price that the earliest corn of good quality invariably brings.

Market Gardeners and Private Planters will do well to consider, that our Northern Grown Seed will give them earlier corn than will seed of the same varieties grown farther south. Our Seed Corn is thoroughly tested, before it leaves our hands.

NOTE:—We are frequently asked what varieties should be planted in order to secure a succession of sweet corn throughout the season. To all who are in doubt, and those already satisfied, let us say: Plant White Cob Cory, for earliest; Portland, for medium, and N. K. & Co's Zig Zag, for late, and secure the very best sweet corn in each class.

SWEET CORN.

One quart will plant 200 Hills; 8 to 10 quarts for an acre in Hills. OUR PACKETS contain on the average about 150 Seeds. Please bear in mind that our quart prices INCLUDE POSTAGE. Pints supplied at quart, Pecks at bushel prices. Deduct 5 cts. a pint, 10 cts. a quart if sent by express or Freight.

EXTRA EARLY.

EXPERT OPINIONS.

Mr. Carman, editor of the Rural New Yorker pronounces N. K. & Co's "Zig Zag" "the finest quality and the heaviest yielding" sweet corn he ever tried. "Always two and often three ears on a stalk." The Michigan Experiment Station says of our "Zig Zag." "Ears good size and well filled out. It reaches maturity with the Stowell's Evergreen and continues to furnish edible corn longer than any other variety that we ever tested. Its season this year extended over a period of three weeks, when it was cut with frost. At that time it looked as green and vigorous as ever."

The New York Experiment Station said:—"The Zig Zag Evergreen Sweet Corn sent to this station for trial has proved itself one of the best late corns we have ever tested. This makes it especially valuable, as early varieties are offered in abundance."

Westerfield's Chicago Pickling.

CUCUMBERS.

OUP School Garden Flower Mixture and ITS NAME had origin in a work that was ment League in Minneapolis, towards interesting children of the Public Schools of this city in the knowledge and culture of flowers.

As it was desired that each child should grow a number of varieties, the League was at the outset confronted with the problem of how to furnish so many thousand pupils a sufficient assortment with the com-

paratively small amount of money available for that purpose.

In discussing this matter with us, we suggested that a mixture be made of a number of the best and most popular annual varieties, and that a large packet of this mixture be given to each scholar. This plan was adopted, and for the results obtained it is sufficient to refer to the letters from Dr. CHAS. M. JORDAN, Superintendent of the Minneapolis Public Schools, Mrs. T. B. WALKER, of this city, and Mrs. BARNARD, Chairman of the League Flower Committee, as well as to the fact that for the past five years we have SUP-PLIED THIS MIXTURE FOR THE SAME PURPOSE TO THE WOMAN'S IMPROVEMENT LEAGUE.

So popular did this mixture become, locally, that we last year decided to offer it for sale, and in order to introduce it we fixed a nominal price of 10 cents a packet, and offered \$50.00 in CASH PRIZES to those growing the largest number of varieties from a single packet.

Elsewhere will be found the report of the awards, together with the letters and photographs of successful

This Mixture gave such universal satisfaction, and the contest awakened such interest among our customers, that we have decided to this year offer CASH PRIZES amounting to \$150.00, which will be paid as hereinafter specified to those sending in their reports on or before November 1st, 1899.

Caution. We wish to emphasize the fact that our SCHOOL GARDEN FLOWER MIXTURE is not to be IN ANY WAY compared with mixtures offered as "WILD FLOWER GARDEN MIXTURE," or under any other name. These, for the most part, are made up from seeds that have been "left over" at the end of the season, or that have lost vitality.

Our School Garden Flower Mixture is composed of the FINEST and FRESHEST SEEDS OBTAINABLE, and contains the RAREST and MOST BEAUTIFUL annual sorts, obtained at large expense from the most reliable flower seed specialists of America and Europe, ESPECIALLY FOR THIS PURPOSE.

The price at which we now offer this Mixture, 25 cents, has enabled us not only to INCREASE THE SIZE OF OUR PACKETS, but to add many NEW and MAGNIFICENT sorts, so that now it might well be called THE COMPLETE FLOWER GARDEN MIXTURE, embracing, as it does, NEARLY EVERY DESIR-

ABLE FLOWERING ANNUAL GROWN.

A LARGE PACKET, amply sufficient to plant a bed 30 FEET SQUARE, WILL BE SENT POSTPAID TO ANY ADDRESS ON RECEIPT OF 25 CENTS. (Stamps accepted.) FULL CULTURAL DIRECTIONS ARE PRINTED ON THE BACK OF EACH PACKET. THE POSSESSION OF THE PACKET ENTITLES THE HOLDER TO COMPETE FOR THE \$150.00 CASH PRIZES.

School Garden Flower Mixture Prize Winners for 1898.

We take pleasure in presenting portraits of four of the PRIZE WINNERS in the SCHOOL GARDEN FLOWER MIXTURE CONTEST OF 1898. We were unable to secure in time for publication, the picture of the winner of the fifth prize, Mrs. Chas. C. Case, of Chatfield, Minn.

HOW THE PRIZES WERE AWARDED.

The letters and lists received up to Nov. 1st, and of which there were several hundred, were, shortly after that date, placed by us in the hands of S. B. Green, Professor of Horticulture in the Minnesota State University, who appointed a committee of students to examine the claims and award the prizes. The report of the committee is as follows: NORTHRUP, KING & Co., Minneapolis, Minn. "School of Agriculture, St. Anthony Park, Minnesota.

DEAR SIRS: The committee appointed to examine the reports sent in by the contestants for the prizes offered by you in connection with your School Garden Flower Mixture, find that, in our judgment, the following persons are entitled to prizes:

First Prize, Second Prize, Third Prize, Fourth Prize, \$25.00, 15.00, 5.00, 3.00, 2.00,

Miss MINNIE TULLAR,
Mrs. DE ETTA INGALLS,
Mrs. JOHN WARD,
Miss LIZZIE CONSTANCE,
Mrs. CHAS. C. CASE,
Warren, Minn.
Northport, Stearns Co., Wash.
Eau Claire, Wis.
New Richmond, Wis.
Chatfield, Minn.

We found it quite difficult to award these prizes, as many of those reporting did so very indefinitely. Some reported on the number of colors instead of varieties or species, and others the number of plants grown. In reading these reports we could not but be impressed with the fact that everyone seemed to be very much pleased with this mixture, producing as it did such a large number of varieties and so beautiful a display of colors.

LEROY CADY, Chairman."

WHAT THOSE WHO HAVE GROWN OUR "SCHOOL GARDEN MIXTURE" THINK OF IT.

Our space only admits of brief extracts from a few of the many hundreds of letters we have received expressing the satisfaction this mixture has given those who have tried it, and it is no exaggeration to say that we could fill this entire catalogue with the letters written in praise of this mixture, pleasing and satisfying the most skillful flower growers, as well as the youngest and most inexperienced beginner in floriculture.

"The Most Beautiful Garden."

From a packet of your "School Garden Mixture" I succeeded in having the most beautiful garden in New Richmond. I raised at least 300 plants, I would recommend this mixture to all who wish to have a beautiful flower garden.

LIZZIE CONSTANCE.
New Richmond, Wis.

"Never Saw Anything So Beautiful." I must say that I never saw anything so beautiful as these flowers have been all summer. They have been greatly admired. There were many flowers I never saw before.

MISS. DEETTA INGALIS, NOTHINGTH, Wash.

"Different Flowers all the Time."

The flowers from your "School Garden Mix-ture" were very handsome. It was the pretti-est bed in the yard Different flowers all the time. Mrs. H. M. Webb, Berlin, Md.

"The Best Garden for Miles Around."

I never had so beautiful a flower garden in my life. Something new nearly every day for a long time; and the garden seeds were everything one could expect. We had the best garden for miles around. Everybody that came asked where we got our seed.

MRS. W. A. FRIDLEY, Argusville, N. D.

"A Comfort to Me."

I had a beautiful bed of flowers from your mixture. They were much comfort to me.

MRS. VICTORIA BONES. Parker, S. D.

"I Was Delighted."

I was delighted with the "School Garden Flower Mixture." The flowers in it have been in bloom since the middle of June. CARRIE A. CARPENTER, Grand Junction, Ia.

"All the Seeds Must Have Come Up."

The flowers in this mixture were so satisfactory I should be pleased to try them another year. I had 55 varieties, some very beautiful flowers. I think all the seeds must have come up.

MRS. JAMES R. WHITEHEAD,

Trenton, N. J.

"Lovely,"

I have shown these flowers to my neighbors and they thought them lovely.

MRS. ALICE C. (ETCHELL, Dover, Me.

"Made a Beautiful Collection."

'Made a Beauthul contenton.

I was much pleased with my success with your "School Garden Mixture." I had 32 entirely different kinds of plants, and so many different colors of almost every kind that it produced altogether III different varieties of blossoms. I made a beautiful collection of pressed flowers. MRS. L. E. MCDANIELS.

Janesville, Wis

"Simply Beautiful."

I had 70 varieties of the "School Garden Mixture," and they were simply beautiful. To say that I was pleased with your seeds would not half express it. With the exception of one packet they all did wonderfully well. The California Wonder Beans were just what we had been looking for and never found before. The vines were just loaded with pods.

HANNAH CORBIN, Champlain, N. Y.

"Worth Dollars to Me."

Our neighbors were all amazed to see such a pretty flower garden in bloom all summer. They said it beat theirs all hollow. Everybody said that the flowers were just fine. I thought so, too, when I could get a nice boquet at any time. They were worth dollars to me. FREDDIE J. FEIST, Northfield, Minn.

"Beautiful Colors."

We had a beautiful variety of colors. Had Pansies that measured 2½ inches across.

MRS, CLARA H. NASH, Balaton, Minn.

"Were a Sight to See."

I had lots of the townspeople drive out here in the evening to see my flowers. They were a sight to see. One woman told me she had sent to New York and bought 200 kinds of seed and the had not half as many kinds. MRS. J. T. POTTER, Arlington, Ia.

"Never Saw Such a Sight."

I have had the loveliest flowers anyone ever saw, and the most abundant lot of them. People stopped to looked at them whenever they passed, and one man Said he had never seen such a sight. I shall have to buy my seeds from you next year.

KATE CHURCH,
North Huron, N. Y.

"The Admiration of All Eyes."

I wish to state that my flower beds that came from your seeds have been the admiration of all eyes. Pearl Pendergrass, Gatewood, Miss.

"Wonderful to Behold."

The Poppies from your "School Garden Mixture" were something wonderful to be-hold, as there were eight different varieties of these alone. MRS. F. BLUE, Minton, Ind.

"A Bed of Beauty."

In spite of the heavy rains the "School Garden Mixture" was a great sucess. They were a bed of beauty. Our gardeu is near the road and everyone seemed to admire them, and often would come in to look at them.

MARY KOEHLER, Pendleton, Mo.

NORTHRUP, KING & CO.'S

School Garden Flower Mixture.

Central High School, Minneapolis, Minn.

"A Perfect Success."

The "School Garden Flower Mixture" I bought of you was a perfect success. They were the handsomest flowers I ever saw. They were praised by every one who saw them, and I sent a number of boquets to friends. I am sure that every one who bought a packet of your "Flower Mixture" should be pleased with it.

DAISY SEIWELL, Harker's Corners, Ill.

"218 Blossoms on One Plant."

I have one single plant from your "School Garden Mixture" that is in bloom now and has 218 blossoms and buds. It is so beautiful! There have been several ladies to look at it, and not one of them know what it is. I am well pleased with your vegetable seeds which we planted,

SARAH E. TRAYER, Auburn, Neb.

The "Best Ever."

I think your flower seeds were the best I ever tried, and hereafter will patronize no other firm except yours.

LYDIA VANSKIKE, Elgin, Mo.

"Pleased."

Am well pleased with flower and garden seeds re-ceived from you last spring. MRS. FRED HARTELL, Springfield, Mont.

"Lovely."

The flowers I raised were so lovely, and so many s. LEONORA MILLER, Rock Stream, N. Y. kinds. Very Interesting."

My little daughter, Myra, purchased one packet of your "School Garden Flower Mixture." She raised a fine lot of flowers, and we all found them very interesting. MRS, MYRA B. BURNELL, Cumberland, Me.

Letter from Dr. Charles M. Jordan, Superintendent of Minneapolis Public Schools.

MINNEAPOLIS, NOV. 181, 100...

NORTHRUP, KING & CO.,
GENTLEMEN: I desire to express the obligations under which the public schools of this city are to your firm for the interest you have shown in the flower work organized among the pupils of the public schools by the Woman's Improvement League. This movement has already accomplished a great work. It has interested thousands of the school children in the cultivation of flowers, and has done a great deal toward beautifying the city. Many an unsightly yard has been transformed into a beautiful flower garden by means of the flower seeds which were generously contributed by Northrup, King & Co. These seeds, so far as I have been able to observe, "always grow."

Yours very truly,
CHAS. M. JORDAN, Supt.

"A Pretty Sight."

The flowers grown from your "School Garden Mixture" were as pretty a sight as any one ever saw.

MRS. G. E. GROVES, Coffeeville, Miss.

"Something New."

From your "School Garden Mixture" I realized a great deal of pleasure looking for something new every day.

MRS. H. J. DEEMS, Sciota, Ill.

"Took Premiums."

I was very much pleased with results. There were eight different kinds of flowers that I did not know the names of. Had never seen anything like them. We took some premiums this fall on these flowers.

MRS. FRED WERGES, National, Ia.

"A Wonder."

The seed I bought of you all germinated well, both vegetable and flower. Think the flower seeds must have all come up, for there were about 200 poppies. My yard has been a wonder to my neighbors.

MRS. P. W. FARRAR, East Peru, Me.

"Admired by All."

My daughter, Maud, planted one of the packets of your "School Garden Flower Mixture," and she raised the finest kind of flowers I ever saw. Every one that saw them admired them. We counted over 300 plants that bloomed. C. M. DAVIS, Smith's Grove, Ky.

"Gave Pleasure."

I cannot tell you how much pleasure that flower bed gave my children. Every day they went to see it and would find something new. Mrs. GEO. BECK, Rutledge, Minn.

"Prettiest in the Garden."

I was very much pleased and surprised with the "School Garden Flower Mixture." Every day something different. MRS. MAUD MCKEE, Fergus Falls.

Letter from Mrs. Barnard, Chairman Flower Committee, Minneapolis Improvement League.

NORTHRUP, KING & CO., City.

KIND SIRS: Please accept sincere and hearty thanks from the Minneapolis Improvement League for your generous gift of seeds for nine thousand children. I wish to express the highest praise for the "School Garden Mixture," as it has yielded in many cases wonderful results. I wish that I had accomplished my purpose last year and taken photographs of some of the little gardens. As high as One Hundred and Fifty Plants have been reported from some of the packets. Many of the gardens were most beautiful.

Respectfully, MILDRED M. BARNARD, Chairman Flower Committee,
MINNEAPOLIS, May 1st, 1897. Minneapolis Improvement League.

Letter from Mrs. T. B. Walker.

MINNEAPOLIS, December, 1898, NORTHRUP, KING & CO.,

NORTHRUP, KING & CO.,

GENTLEMEN: I have been very much interested in the flower work of the Woman's Improvement League of this city from the beginning of their work five years ago. They have spared neither labor nor money in carrying out their schemes for the beautifying of the city through the encouragement of floriculture by the school children. And while their efforts have caused many an unsightly place in the city to disappear, and many an uninviting neighborhood to become like a little park, the best part of their work has been the cultivation in the hearts of the children of the love for the beautiful while caring for their little gardens.

Your firm is deserving of great credit for the assistance which you have rendered the league in assisting to furnish the seeds for their work, and they appreciate most highly what you have done. I sincerely wish that other cities and country neighborhoods would adopt the same plans of encouraging the chidren to "cause the wildeness to blossom as the rose," for no greater sweetness enters into the life of a child than that which comes through the love of beautiful flowers, grown by their own hands.

MRS. T. B. WALKER.

MRS. T. B. WALKER, PRESIDENT NORTHWESTERN HOSPITAL.
VICE-PRES. NAT'L NON-PARTISAN W. C. T. U. SECRETARY SISTERHOOD OF BETHANY.

50.00 IN CASH

WILL BE PAID AS FOLLOWS AS PRIZES FOR

NORTHRUP, KING & CO.'S School Garden Flower Mixture.

\$100.00

For the Greatest Number of Species grown from a single package.

First Prize, \$40.00; 2d, \$25.00; 3d, \$15.00; 4th, \$10.00; 5th, \$5.00; 6th, \$3.00; 7th, \$2.00.

Contestants will please observe that the \$100.00 prizes are for the greatest number of SPECIES, not Varieties, grown from a single package. For instance, Asters would count as one, no matter how many different colors or kinds there may be.

\$30.00

For the Best Photographs of the Gardens grown from our School Garden Flower Mixture.

First Prize, \$15.00; 2d, \$10.00; 3d, \$5.00.

\$20.00

For the Best Essay on "How to Grow Northrup, King & Co.'s School Garden Flower Mixture."

First Prize, \$10.00; 2d, \$5.00; 3d, \$3.00; 4th, \$2.00.

CONDITIONS OF COMPETITION.

Reports, Photographs and Essays must be accompanied by the envelope in which the seed was received, and must be received by us on or before Nov. 1st, 1899.

Our checks for the amount due the prize winners will be forwarded as soon after Nov. 1st as the decision can be made. The names, addresses, and (if possible) the pictures of successful competitors will be given in our Catalogue for 1900. While all cannot win the cash prizes, everyone who purchases a package of the School Garden Mixture will feel amply repaid for their investment in the beauty and variety of the flowers they secure.

This mixture is sure to be popular with every one. Even practiced floriculturists will find much to interest and surprise them in the variety and beauty of the flowers, while children are simply delighted and can scarcely wait until the flowers are unfolded, in their anxiety to see what they are "going to be."

REMEMBER

That the possession of a packet entitles anyone to compete for the above mentioned prizes, and will be mailed to any address on receipt of 25 cents.

SPECIAL NOTICE.

Do not overlook our offer to send a regular package of our School Garden Mixture free with every order for Vegetable or Flower Seeds (or both) in packets, amounting to 75 cents, at prices named in our Catalogue.

This offer does not apply to seeds by the pound or bushel, but only to Vegetable and Flower Seeds in packets.

The Most Wonderful Green-house in the World.

At first sight, the reader will naturally inquire, what can there be about this small, rudely constructed affair to on. small, rudely con-structed affair, to en-title it to be called, "The most wonderful greenhouse in the world"?

We think, however, that the few facts our space allows us to pre-sent, will justify that title and interest our readers.

The greenhouse, of which our illustration which our illustration is a direct reproduction, is situated in Upper Geyser Basin, Yellowstone National Park, Wyoming. The altitude at this point is 7400 feet above sea level, and there is not a month in the year that ice does not at some time form. Nevertheless, this greenhouse is heated without fire, and produces veg. fire, and produces vegetables of the finest

house in the world.

The simple facts are these: The greenhouse is built over a running stream, which comes from a six inch hole in the formation, at a temperature of 195° F. This not only at all times, furnishes ample heat, but the vapor with which the ed from dry seed came up in two days; Cucumber in three days; Radishes in four days. Lettuce, twenty-eight days after planting, measured twenty-two inches across. Cucumbers were gathered in thirty-four days after planting, and yielded almost beyond belief.

We are indebted to Mr. W. P. Howe, manager of the hotel at Upper Geyser Basin, and the originator and builder of this unique greenhouse, for the above and many other interesting particulars about it. We have also learned that Mr. Howe, very kindly, (and without our knowledge.) caused a large sign to be painted and prominently displayed on the premises, bearing the words: "THE SEEDS USED IN THIS GREENHOUSE ARE FROM NORTHRUP, KING & CO., SEEDSMEN, MINNEAPOLIS."

Over four thousand people visited this curious vegetable house during the season of 1897, and with one accord pronounced it one of the greatest wonders of the Yellowstone National Park.

THE "ROCKY FORD."

Rocky Ford Musk Melon.

THE ROCKY FORD MUSK MELON.

The Melon known on the "bills of fare" of the leading hotels and restaurants of America as the "Rocky Ford Canteloupe" takes its name from the little town of Rocky Ford, Colorado, which has become as famous for its melons as is Baltimore for its oysters. The shipping of these melons has reached such proportions as to cause it to become the leading industry of the town, thousands of crates being annually forwarded to the principal cities of the United States.

The reason for the wide-spread popularity of these melons is two-fold. First, its superb table qualities, being firm, sweet, and remarkably solid. Second, its wonderful shipping qualities, which en-

able it to be carried great distances, and yet arrive in first-class condition for market. The fruit is of medium size, oval shaped, heavily netted and very solid. The flesh is green, thick and juicy.

It is very early and wonderfully productive. No doubt there will be a very large demand for this variety the coming season, and inferior stock will be put upon the market.

We obtained our seed at high cost direct from Rocky Ford. Those who purchase their seed from us can fully rely on securing the genuine stock.

Pkt. 15c., oz. 30c.. ¼ b. \$1.00, Lb. \$3.00.

WATER MELON.

Our Packets of Water Melons contain on the average about 100 Seeds.

Northrup, King & Co's Klondike. The earliest. The great objection to the extremely early water melons has been their inferior quality. This has been entirely overcome in the KLONDIKE, which is offered with the full assurance of not only being remarkably early, but assweet, delicate, and melting in flavor as any variety grown. The flesh is of deep scarlet. Rind thin and on this account is not a particular good shipping sort. It will ripen in altitudes where it has not been thought possible to mature a good water melon. It is to all other varieties of water melons, what the early Minnesota is to tomatoes. The earliest and of quality second to none. Pkt. 10c;

Oz. 20c; ½ 1b. 40c; 11b. \$1.00.

Duke Jones. This is the latest introduction of Mr. Girardeau, the "Melon King" of Florida. Dark green rind. bright red flesh, early, prolific, very large. The agent of the road over which Mr. Girardeau shipped his melons states that "several carloads averaged over 40 lbs. to the melon." Large Pkt. 3c; Oz. 15c; ½ 1b. 25c; 1 lb. 75c.

Green and Gold. Golden orange flesh, skin very dark green;

¼ 1b. 25c; 1 lb. 75c. Large P Green and Gold. Golden orange flesh, skin very dark green;

Melon Peach. The fruit is about the size of a large peach, oval shaped, and of a bright orange color, somewhat russeted. For sweet pickles, pies, or preserving, they are superb; a few pieces of sliced lemon or a little lemon essence adds to their flavor, and is usually desirable. They are easily cultivated, wonderfully productive and can be used in every way in which you would use a peach, except that they are not usually liked raw; although some consider them excellent simply sliced with a little sugar on. Pkt. 5c; Oz. 30c. Kentucky Wonder. We intro-Melon Peach. The fruit is about

3

15 40

Rentucky Wonder. We introduced this melon in 1886. At that time we thought it the best melon; in 1898 we think the same. One just cause for criticism on many of the new melons that have of late been sent out, is that for the most part they have been, at the best, slightly improved strains of some old and well-known sort. This cannot be said of Kentucky Wonder. It is distinct and the melon itself proves it. In shape it is oblong, attaining a good size, skin dark green and beautifully marked. Flesh a beautiful rich scarlet color, crisp, rich, sugary, always firm and solid, never mealy or tough. Kentucky Wonder has won first prize over such well-known and popular sorts as Ironclad, Cuban Queen, Kolb's Gem, etc. Large Pkt, 5c; Oz. 10c; ½ lb. 20c; 11b. 60c.

We consider our Minnesota Grown Onion Seed the Finest in the World. We do not believe that any seed grown will produce Onions that will Ripen as Early, Keep as Long, or produce as small a percentage of "thick necks" or "scullions."

ONIONS.

Our Packets of Onion contain on the average about 1,500 Seeds. One ounce will sow 100 feet of drill; 4 to 5 lbs. to the acre are required for large Onions, 50 to 60 lbs. to the acre for sets or pickles.

"I made a mistake in planting the Red Wethersfield Onion I got from you. I put the seed in thick, allowing for bad seed, in BUT THEY ALL CAME UP, and gave me the trouble of thinning them out. It is a MARVELOUS ONION."—ANGUS MCDIONELL, Wausaukee, Wis.

"Your Red Wethersfield Onions were the finest I have ever grown."-D. H. TRACY, Effington, S. D.

E4444444444

In order to impress upon Onion Growers the great care we have exercised in the selection of this onion, we attach the following statement from our Mr. Charles C. Massie who was entrusted by us with the selection and planting of the bulbs from which our Globe Wethersfield Onion Seed was this year produced.

MR. MASSIE'S STATEMENT

I certify that I personally attended to the selection and planting of the Globe Wethersfield Onionad that the onion shows in the acompanying illustration correctly represents in shape and size all the bulbs from which the crop of seed was produced. I also attended to the threshing, cleaning and testing of said seed, and believe it represents as pure and select a lot of Onion Seed as is possible to produce.

CHARLES C. MASSIE. Minneapolis, Dec. 20th, 1897. **#**************** and fairly shows its natural size and shape.

This is really a Red Globe Onion of the finest and most select type and we believe it to be unequalled by any stock in existence. We have called it N. K. & Co's Globe Wethersfield in order to distinguish it from all other stocks of Red Globe Onion from which it Jiffers, not only in purity of stock and perfection of shape, but in earliness, productiveness and beauty of color. The outer skin possesses that lustre and richness of color so desirable and yet so often lacking in Red Globe stock. We have been led to pay special attention to this onion, as we believe Globe Shaped Onions to be the onion of the future. They are most a tractive in appearance, most economical in use, and usually they command the highest price. They are more profitable than flat varieties to grow, as they occupy no more room in the row, but weigh more and measure better. Price: large pkt. 10c, oz. 30. ½ 1b., \$1.00; 1b. \$3.25.

CAUTION: For the protection of our customers and ourselves, every package of the onion sold whether it be large or

small, will bear a fac simile of our trademark as shown at lower right hand corner of this page.

ONIONS.

PRIZETAKER. This onion has become a great favorite on account of its large size and great solidity. It is perfectly globe-shaped, with bright straw-colored skin; the necks are very small and the onions always ripen up hard. An excellent keeper, exceedingly fine flavor grows to an enormous size. Onions weighing 5 lbs., having been grown from seed the first year. One of our Minnesota customers reports that he sold during the part season a large portion of his crop at \$1.25 a bushel, and at a time too when ordinary onions were going slowly at 30 cents a bushel. Prizetaker is the favorite variety for transplanting. On account of its being somewhat late, it is not recommended for general planting in the extreme north. Large pkt., 5 cts.; 0z., 70 cts.; ½ lb., 50 cts.; 1b., \$1.50. postpaid.

BERMUDA ONIONS. These onions grow to an immense size and are of beautiful form. The skin is very thin; flesh white, flue grained, of mild and pleasant flavor. It will grow an onion from one to one and a half pounds from seed, but to attain the full size the bulb should be set out the following spring. White or red, each, per pkt., 10 cts.; Oz., 20 cts.; 41b., 50 cts.; 1b., \$1.50, postpaid.

sPANISH KING. This handsome variety is a splendid type of the Yellow Spanish Onion. The flesh is remarkably firm and of the finest quality, of rapid growth and matures early. The skin is of a transparent golden straw color. Pkt., 5 cts; oz., 10 cts.; 1/4 lb., 30 cts.; lb., \$1.00, postpaid,

AUSTRALIAN BROWN. Remarkable for its long keeping qualities. The quality is excellent and it is earlier than the Yellow Danyer.

WHITE BARLETTA. This variety is most distinct on account of its great earliness. It is earlier than the White Queen. It is of a beautiful waxy white color and grows 1½ inches in diameter and ¾ of an inch thick, with finely formed bulbs, slightly flattened at the top. Its earliness will highly recommend its use as a substitute for onion sets. An excellent pickling sort. Postpaid.....

THE FARMER'S GARDEN.

Farmers as a class do not have good gardens. This is doubtless owing to the rush of work in the spring, and to the fact that hand labor is expensive and not always available.

MR. A. K. BUSH, Horticulturist, with the Minnesota Farmers' Institute, also a practical gardener and farmer, has at our request, prepared an illustrated plan of the Farmers Garden, he is advocating. It is the most practical thing of the kind ever brought to our attention,

and does away very largely with hand labor. MR. BUSH'S plan provides for a Fruit and Vegetable Garden that may be easily cared for with the aid of a horse and ordinary farm cultivator. It is illustrated by a diagram, and instructions are given as to culture, rotation, etc. Every farmer, in fact every one who has or wants a garden, should have this folder, entitled, "THE FARMER'S GARDEN." It is Free to those who send us an order and ask for it.

Scientists make the startling assertion that lung and kidney ailments are rapidly increasing among the farmers of America, and assign as one of the principal reasons, the lack of vegetable food in sufficient variety.

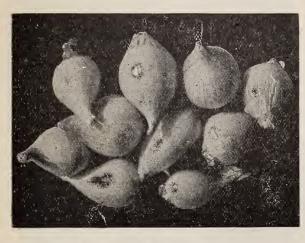

Extra Early White Queen Onion.

--THE--

IMPORTANCE OF USING NORTHERN GROWN ONION SETS.

Onion Sets are planted in order to obtain onions earlier than they can be had from seed. It follows therefore that Northern Grown Onion Sets will produce onions earlier than southern grown sets. In addition to this our sets are incomparably superior to ordinary stock, being of small size, sound and free from trash. PRICES subject to market changes.

N. K. & Co.'s White Silverskin Onion Sets.

Top Onion Set.

PARSLEY.

Our Packets of Parsley contain on the average about 2000 Seeds.

Champion Moss Curled Parsley. For garnishing; no variety is more attractive when well grown; resembles a tuft of finely curled moss, is hardy and slow in running to seed. Pkt., 3c; oz., 7c; ¼ lb., 20c; lb., 60c;

postpaid. Emerald. postpaid.

Emerald. Distinct in appearance from any of the other varieties, being of a lighter and more brilliant shade of green. The plant is of dwarf habit, with leaves finely cut and very curly. To growers for the market as well as for private gardens we commend this sort. Pkt., 3c; oz. 7c; ¼ lb., 20c; lb., 70c.

Extra Double Curled. A fine dwarf variety, beautifully curled; excellent for garnishing. Pkt., 3c; oz., 7c; ¼ lb., 20c; lb., 50c.

Plain. The leaves of this sort are plain; it is hardier than the curled variety. Pkt., 3c; oz., 7c; ¼ lb., 15c; lb., 50c.

Hamburg or Turnip-Rooted. A fleshy-rooted kind; the roots used for flavoring soups. Pkt., 3c; oz., 7c; ¼ lb., 15c; lb., 50c;

PARSNIP.

Our Packets of Parsnip contain on the average about 1500 Seeds.

Hollow Crown. We believe this is the finest stock of Parsnip that can be procured. The roots run of uniform size, and are smooth. The growing taste for this delicious vegetable will make this improved strain particularly desirable. Pkt., 3c; oz., 7c; ½ lb., 15c; lb., 50c.

Long Smooth. A fine flavored variety. Pkt., 3c; oz., 7c; 1/4 lb., 120;

Early Round. An early variety, but of small size. Pkt., 3c; oz., 7c; ¼ lb., 15c; lb., 50c.

To Market Gardeners.

Market gardeners as a rule send away from home for their seeds.

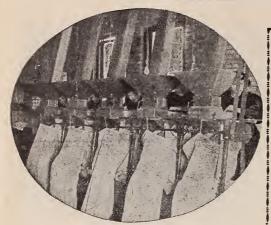

their seeds.

Our orders from distant cities are increasing in number and size each year, and this of course gives us great satisfaction. We are best pleased 'lowever to be able to state that we have and hold the trade of the best gurdeners of our own town.

Such expressions as those of Mr. Busch (page 21 and of Mr. Busch (page 23) are but a type of many we could and would be glad to print, did space admit.

Moss Curled Parsley

A Corner of our Picking Room. From a Photograph.

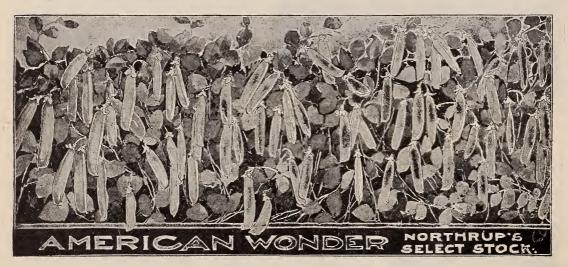

Northrup's Summit, Height 2½ ft.

SEED PEAS.

Northern Grown Seed Peas are earliest, hardiest, most productive, and we make a SPECIALTY of them. The level fields of the Northwest produce crops of a uniformity unknown in other pea growing sections. Our crops are thoroughly "roguged" while growing. Samples are fine, free from the pea weavil and thoroughly handpicked.

PRICES. In order to encourage purchases from large planters who live at distant points, we have made exceptionally low prices. Freight rates named on application. Note also, that pints are supplied at quart prices. Pecks and half bushels at bushel prices. No charge for bags, Do not overlook that as our quart prices include postage, 15 cents a quart—7c a pint should be deducted if sent by express or freight at purchaser's expense.

First and Best. Height, 2½ ft. Bu. 10 Bu.

FIRST EARLY PEAS.

Our Packets of Peas contain on the average about 150 Seeds.

One quart will plant about 100 feet of drill. One and one-half bushels to the acre.

A WORD ABOUT PRICES.

In purchasing an article of clothing, purchasers can examine its texture, and satisfy themselves as to its quality, and there are tests which wolldeterm-

in the value of every article of merchandise Except SEEDS, for which the only test is that of time. Frequent advantage is taken of this by seeds men, to ask unreasonable prices for their unreasonable prices for their seeds. and when asked why their prices are higher than those of other firms, their reply is, "Bewere of Cheap Seeds," etc. We say too BEWARE OF CHEAP SEEDS, whether sold at ridiculously low or ridiculously high prices, for there has been as much humburgery in the one humbuggery in the one as in the other. By GOOD SEEDS at Fair Prices, we mean the Best Seeds obtainable at prices that are fair to the purchaser and to the seller.

"GOOD SEEDS NOT PART OF THE TIME, BUT ALL THE TIME

"I have purchased the greater part of my seeds of your house for more than 12 years, and they have given me every satisfaction.

It is worth a great deal to a market gardener to know where he can get good seeds, not part of the time, but all the time."

Minneapolis, Nov. 15, '97. NELSON REEVES.

Mr. Reeves is one of the principal gardeners of Minneapolis. In addition to his out door crops he owns and operaies? I large Green Houses, all of which are devoted to vegetables, except his Pansy House. From this hemarkets each year several hundred thous and pansy plants (grown by the way from our Imperial German Strain which those who have used it consider unequalled for beauty and diversity of color and marking).

RADISH.

French grown seed make solid Radishes—Our packets of Radishes contain on the average about 900 Seeds—A light, quick, rich soil is best for Radishes.

AMERICAN COFFEE BERRY. (Soya Bean.)

5 20 50

1.75

Known as Little Oronoco in some localities.....

Coffee (and very good Coffee, too,) for One Cent a Pound.

While nothing quite takes the place of good old Java or Mocha Coffee, the Coffee Berry, when used alone, makes a healthful, pleasant and economical beverage, with a strong coffee flavor, and quality superior, in our estimation. to the many coffee substitutes now on the market. When blended and ground with good coffee, half and half, its presence can scarcely be detected. It is prepared just like coffee. The beans, which are about the size of the real coffee berry, are roasted, ground, and used either alone or mixed with coffee, as may be preferred. The plant, which takes, from four to four and one-half months to mature, is about three feet in height. It fruits from the ground up, and on the limbs in every direction. The pods, of which there are from 150 to 250 on a plant, touch each other, so closely together do they grow. The pods contain on an average from two to three beans, of the shape and size shown in the illustration.

CULTURE. The rows should be planted three feet apart, one berry every ten inches apartin the row. Cultivated like corn or beans, and should be planted about the same time. PRICE. Large pkt., 10c; ¼1b., 25c; Lb., 75c; 5 lbs. @ 60c, by mail postpaid. Special prices in large quantities. While nothing quite takes the place of good old Java or Mocha Coffee,

Our "STERLING" Lawn Grass Seed makes Perfect Lawns.

ARTICHOKE ROOTS.

The New Large Jerusalem Variety; producing from 400 to 1000 bushels per acre. An excellent food for cattle, sheep and horses. Fed to milch cows they are for the production of milk, equal if not superior to bran. But their greatest value is for food for hogs, Even the labor of feeding is avoided, as the hogs will help themselves if allowed to do so. We consider them the cheapest and healthiest hog food possible to raise, and find that where brood sows have free access to Artichokes, they and their pigs invariably do well. There is no better food to build up large, healthy frames, with plenty of bone and muscle. Hogs will not only grow, but fatten on them.

On good land, with the same culture as corn, Artichokes will produce from 400 to 1000 bushels per acre. A. C. Williams, of Iowa, a very prominent breeder of Poland Chinas, says; "Forty head of hogs and pigs may be kept without other food on an acre of Artichokes from the time frost is out of the ground until they grow again, and from October 1st until the ground freezes again. They produce more hog food per acre than any other crop I am acquainted with, and the hogs will harvest the crop themselves. Artichokes also produce an immense quantity of tops, of which cattle, horses and mules are very fond, and which makes excellent food when properly cured. A chemical analysis of roots shows them to be superior to Carrots, Parsnips, Mangels, Sugar Beets and Turnips, both as flesh and as fat formers."

PLANTING, CULTURE, PRICE, ETC, Artichokes need planting but once, and little or no culture after the first year. Cut as potatoes, only smaller; plant in rows three and one-half feet apart. Plow deep, plant shallow, say two inches; the second year, break up the ground as for corn; will come up thick all over the Surface. Run through each way with a cultivator when a few inches high. Prices, 1 lb., 30c.; 4 lbs., \$1.00, by mail postpaid. By freight or express \(\frac{1}{2} \) bu, \(\frac{1}{2} \) bu, \(\frac{1}{2} \) bu, for 1 acre, \(\frac{1}{2} \) bu. for 1 acre, \(

ASPARAGUS ROOTS.

By far the most satisfactory way to obtain an Asparagus bed, is to set out the roots. We send out no roots that are less than two years old. They may be sent by express or freight, with the assurance that they will arrive in perfect condition for planting.

Asparagus Roots are sent only by Express at purchaser's expense. They are warranted to reach destination in good growing condition.

Some New Flowers.

N., K. & Co.'s STARRY FLAG Sweet Pea collection, postpaid, only 10 CENTS.

This collection consists of three packages, each containing 100 SEEDS of, FIREFLY, the best red (or scarlet), PURITY, the best white, and CAPTAIN OF THE BLUES, the best blue Sweet Pea. Firefly ranks foremost among all the brilliant scarlets. Flowers are of large size. Stems are three flowered and of good length. Purity is the purest of all the white varieties, as it does not take on the pinkish hue often found in white varieties that are otherwise desirable. The flowers are large and finely formed, while the stems are long and stiff. Captain of the Blues is a large and very free flowering variety, producing 3 or 4 blooms on good stems.

THREE HUNDRED SEEDS of These Beautiful Sweet Peas for only 10 GENTS POSTPAID.

IRISH SHAMROCK.

There are many who will be glad to obtain seeds of the True Irish Shamrock, the National Emblem of Ireland. The seed has been difficult to obtain, even in Ireland, and it is necessarily somewhat high in price. That which we offer is obtained from an Irish Seedsman, through a well known Philadelphia house, and is represented to us to be true stock of this historic plant, Pkt., 10c; 3 pkts. for 25c.

CROTALARIA RETUSA.

This striking novelty was last year offered by various Seedsmen under the name of Golden Yellow Sweet Pea, Dwarf Golden Sweet Pea, etc., and, while the blossoms are a true Sweet Pea form, flowers of a brilliant yellow coloring set off by a blotch of maroon on the wing, here the resemblance to the Sweet Pea ceases, as the plant has no tendrils and requires no support. It is a strong, deeprooted bush, growing about two and one-half feet high, and able to stand alone. It is an annual, blooming early and continuously until killed by frost in the fall. A field of plants is a perfect

Mountain Rose.

of plants is a perfect sheet of gold. A bunch of these flowers placed in water, or mingled with Sweet Peas, form a rich effect and last a long time. As a pot plant, nothing can be more beautiful; while for out-door planting, either with other an-

ettner with other annuals or massed in a bed, nothing can be more effective. Our Crotalaria Retusa. seed is obtained direct from the introducer, Miss Florence Gill. Price, per large pkt., 5c; 3 pkts for 10c.

This magnificent climber is one of the most distinct and valuable acquisitions of recent years. Like Ampelopsis Veitchii, it is freely furnished with long tendrils that attach themselves firmly to stone, brick or wooden walls. It grows with the greatest rapidity and soon covers a large area. Being a native of Montana, it is absolutely hardy and can adapt itself to any soil, locality orexposure. It covers posts, pillars or verandas with a uniform mat of heavy green foliage, which in autumn changes to brilliant crimson. With its gorgeous carmine flowers, which are borne in greatest profusion, a well-established plant of this splendid novelty is a sight to behold. Our customers will miss a rich floral treat if they do not secure the Mountain Rose. Pkt., 10c: 3 pkts., 25c. Be sure and order early, as our stock is limited.

Poppy Anemones (A Charming Novelty).

ST. BRIGID (OR POPPY) ANEMONES. Nothing could be more glorious than a bed of these new Irish Poppies when inflower. It might well be compared to a kaleidescope picture, glistening with and reflecting thousands of bright colors; or to some bright oriental carpet, whereon the artist has exercised his ingenuity to blend pleasing and effective colors. Indeed, the flowers produced by this new strain show all the colors of the rainbow and many more; for even black and white are found among them, as well as shades of pink, rose, crimson, flery scarlet, carmine, maroon, tints of tillac, lavender, blue, purple, and even green. Many flowers are curiously mottled, striped, edged, ringed and shaded with the various tints described above, the effect produced being almost bewildering. They are also frequently of very large size, even 5 to 6 inches across; some single, but most double, with plain, scalloped or fringed edges.

Sown early and planted in the

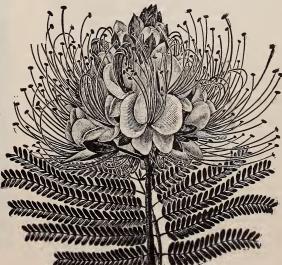

Sown early and planted in the garden in rich soil, they will bloom profusely and frequently until well after frosts have cut down other tender plants; and, being perfectly hardy, they will bloom again the next season in greater profusion than ever. For cutting they are unsurpassed, as the flowers and the beautiful fern-like foliage remain fresh in water for a week or more. The plants can be lifted in the autumn and bloomed in the house for Easter decoration. Pkt., 10c; 3 pkts., 25c.

BIRD OF PARADISE. The color of the flower is a golden yellow, measuring two and a half inches across, with shape as shown in illustration, and are produced in very large trusses. The most beautiful part of the flower is the large pistils, which are spread out in fanilike form, and are of bright crimson color. The foliage is also highly decorative, reminding one of a very delicate Acacia. If the seed is started early it will produce blooms in great profusion the first year. Pkt., 5c.

CAPE FUCHSIA-Phygelius Capensis. Plants barely a few inches high bear from 10 to 20 bold, long spikes, completely crowded with showy scarlet, drooping flowers, persistently produced from May until late autumn, when they can be brought in for winter blooming. It is also a good bedding plant, grown singly or in masses. The seed should be sown in a slight hotbed early in the spring, and the seedlings afterwards transplanted to a warm, sunny position. Pkt., 10c.

ORANGE DAISY. A beautiful perennial plant somewhat resembling an Aster, but having the ray-florets in several series; flower heads flat, about two inches across, bright orange color on strong, stout stems. They are of very easy culture in common garden soil and form excellent subjects for mixed borders. In a moist, well-drained situation, will flower the first season if started early in the house. Pkt., 5c. ORANGE DAISY.

Bird of Paradise (A rare and beautiful flower).

Select List of Flower Seeds.

FREE PREMIUMS.

An order for FLOWER or VEGETABLE SEEDS in PACKETS to the amount of 75 CENTS, entitles the purchaser to one full size package of our SCHOOL GARDEN FLOWER MIXTURE; an order for \$1.50 to 3 packets, with the privilege of COMPETING for the \$150.00 CASH PRIZES OFFERED BY US. See Colored Insert for full particulars.

Our list of Flower Seeds embraces all the popular and easily grown varieties, as well as the best novelties of recent introduction. It will be noted that all along the line we have made radical reductions in PRICES, and, in so doing, we have sacrificed neither quality or quantity. Our Flower Seeds are the finest obtainable.

Our Packets, we believe, contain MORE SEEDS, in proportion to price asked, than those put out by any other house.

We greatly regret that we cannot illustrate every one of the beautiful varieties we list. Prominence is given to a few leading sorts, but many to which but a few lines are given are equally worthy of display.

PETUNIA. N., K. & Co.'s Extra Large Flowering.

Mixed. This mixture embodies all the best varieties and will prove an agreeable surprise even to those who expect much. All odd and notable kinds, black, crimson, white with yellow throats, marble veined, striped, variegated, etc. N., K. & Co.'s Fine Double Mixed. Will produce about thirty per cent of double flowers.

Hybrida. Good mixed. Excellent for bedding; shows many colors.

Lady of the Lake. Pure white. Double fringed, large flowering. Our strain of this magnificent double white Petunia has given great satisfaction. Produces about thirty per cent double flowers.

PHLOX DRUMMONDH. Grandiflora. Large, flowering. Their richness of coloring and long duration of bloom make them a gratifying feature of any garden.

Good Mixed. Colors are excellent, but flowers not as large as preceding.

Starred and Fringed. New race of Phlox. Many distinct and beautiful shades.

Perennial. Finest mixed; very desirable for bedding or border. Hardy.

POPPY. N., K. & Co.'s Imperial Mixed. Single and Double. For great number of varieties, richness and diversity of coloring this mixture is not surpassed.

Shirley. Flowers are large; colors varied. One of the finest sorts.

Fairy Blush. Flowers are immense. Double. Petals fringed.

Leeland. (Perennial). Produce various colored flowers in great abundance the first year.

Tulip. New, fine for bedding. Flowers tulip. haped.

White Swan. Flowers enormous size, perfect form, very double. Snow White.

PORTULACA. Double mixed. Very showy and beautiful. Only about 70 per cent. double flowers can be expected from the finest mixtures. Single, All colors mixed.

PRIMULA. (Chinese Primrose.) The colors include crimson, pink, white, maroon, and the new Holborn blue. Our stock is the celebrated Hays & Wetherall strain of seed, costing us at the rate of \$1.100 a pound in England.

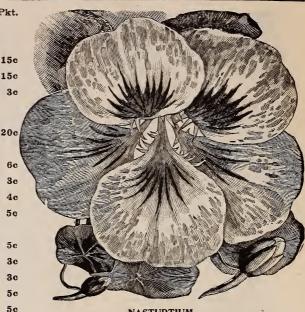

Double. An excellant mixture; all colors.

PRIMOSE. New English. Colors are beautiful. Splendid for borders. Fine for growing in beds. RICINUS. (Castor Oil Bean.) Fine fol

Specimen Pansy from Northrup, King & Co.'s Imperial German.

In the making up of this mixture expense is not considered. We aim to make it the finest obtainable. We will cheerfully refund money paid for this mixture to any one who says it is not the best they ever saw.

NASTURTIUM.

Northrup, King & Co.'s Imperial Dwarf Mixed.

In this magnificent mixture is represented almost every known variety. It has no superior. [See description.]

Multiflora Rose.

True Multiflora or the New Fairy Rose.

They bloom in four months after sowing, so that seed sown in February in the house may be had in bloom in June in the open ground, where they continue to bloom throughout the season, giving about an equal proportion of single, semi-double and double flowers borne in clusters and contain all the tints and colors of cultivated roses. One of the most unique and novel of cultivated roses. One of the most unique and novel pot flowers now grown. Attracts attention everywhere. The only genuine dwarf variety "Rosa Multiflora." The plants grow about one foot high; very hardy and may be treated as annuals. Pkt., 04c.

Mammoth Flowering Verbena.

The largest Verbens known, a single flower often being as large as a twenty-five cent coin. For Garden beds or effective massing, this Verbena is unequalled. [See description.]

NORTHRUP, KING & CO.'S

MR. VAL. RECKER.

LAKE CITY, Aug. 3, 1897. NORTHRUP, KING & Co.

Minneapolis, Minn, Minneapolis, Minn, Gentlemen.—I am well satis-fled with the seed purchased from your house last spring. We have a beautiful display of pea blossoms of variea colors, from the Imperial Mixed Sweet Feas, and be'ieve that every seed "bore its fruit."

Yours truly,

VAL. RECKER.

New Dwarf Sweet Pea, Pink Cupid. Bears generally three and sometimes four flowers to a stem. The flowers are identical with the tall-growing Blanche Ferry and are always fully equal in size. The standard is a bright rose pink, while the wings are pure white or light pink. It will be without a rival as a bedding and border annual, for its color and fragrance make it a rare novelty. The seed we offer was secured direct from the introducerin Sealed Packets containing 12 seeds. Price 15c, or 2 Packets for 25c.

Evening Scented Stock. While the flower is pretty, its great charm lies in the sweet and powerful perfume it emits in the evening, when the flower opens. [See description.]

SUMMER FLOWERING BULBS FOR SPRING PLANTING.

For this list we have selected those bulbs, which while inexpensive are most beautiful and most easily grown. Their culture is simple, and most of them flower the first summer. The bulbs may be kept over winter and will continue to multiply, year after year. A small investment in any of these bulbs will well repay the purchaser.

PLEASE NOTE CAREFULLY. All bulbs and roots will be sent by mail or express, charges prepaid, when ordered at single or dozen rates. At the 100 rate they will be sent by express or freight, the purchaser paying the charges, unless otherwise stated. Not less than six of any one variety supplied at dozen rates, and not less than 25 at the 100 rate. Orders with money should be sent us as early as possibe, and they will be filled in rotation. Bulbs subject to injury by frost will not be sent until such danger is over.

LILIES.

culture. Plant as soon as frost is out of the ground, in fine rich soil, mixed with sand. Set the bulbs from 3 to 5 inches deep, according to size. No water should be allowed to stand around the roots. Once firmly established, they will stand for years.

Lilium Auratum. (The Golden-Rayed Lily of Japan). Flowers are immense, 10 to 12 inches across, very fragrant, color ivory-white, studded with crimson spots and a bright golden band through the center of each petal. Bulbs 15c; 2 for 25c; doz., \$1.30.

Lilium Rubrum. The famous "Ruby Lily" of Japan. It would be difficult to exaggerate the beauty of this glorious lilv. The six broad petals dotted with carmine spots. Very fragrant. Bulbs 15c each, 2 for 25c; doz., \$1.30.
Lilium Album. Pure white, very fragrant. Bulbs, 20c each, 3 for 50c;

7 for \$1.00.
Lilium Longiflorum. The pure white flowers resemble the well known
Bermuda Easter Lily and are very fragrant. 15c each. 2 for 25c; doz. \$1.25.
Lilium Tigrinum, Splendens (Improved Single Tiger Lily). Has very

Lilium Tigrinum, Splendens (Improved Single Tiger Lily). Has very large flowers of excellent form; color, orange-salmon with dark spots. 15c each, 2 for 25c; doz., \$1.25.

Lilium Tigrinum, flore pleno, (Double Tiger Lily). This magnificent lily is of stately habit, bearing clusters of very large double flowers on tall, strong stems; color, bright orange-red, spotted with black. 15c each, 2 for 25c; doz., \$1.25.

Jacobean Lily (Amaryllis Formosissima). The brilliant deep scarlet flowers are often eight inches across and in purity and brilliancy of color are unsurpassed. 15c each, 2 for 25c; doz. \$1.25.

GLADIOLUS.

On account of its intrinsic merit alone, the Gladiolus is entitled to the high rank it holds among flowers; but when is considered, also, how easy is its culture, and for what a small sum a splendid assortment can be secured, it seems a matter of surprise that they are not found around every home. The flower is most beautiful and lasting, and the infinite variety of color and marking render their cultivation

or surprise that they are not round around every nome. Inclower is most beautiful and lasting, and the infinite variety of color and marking render their cultivation very interesting.

CULTURE. They thrive in almost any good soil, except a stiff clay, require full sunlight, and are only liable to injury from rank manure. Plant the bulbs six to nine inches apart, the large ones four inches and the small ones two inches deep. Make an early planting of the smallest bulbs first as soon as the ground is sufficiently dry and warm. Continue to plant at intervals of two weeks during the spring and early summer; in this way a succession of bloom may be had from midsummer until frost. In autumn, before freezing they should be dug and dried, the earth and old bulbs removed, and then stored in a cool dry place, secure from frost until spring.

N. K. & Co.'s Imperial Gladiolus Mixture. Those who have had this mixture know it to be a grand one. For many years we have been adding to it from the new and high priced varieties as they made their appearance, and we mean it to include every desirable sort. It has been our experience that comparatively few people try the named varieties. So we have made a specialty of our Imperial mixture and the plan adopted in their growth by which they are cultivated much like potatoes or corn enables us to offer them at a price ridiculously low compared with what is asked for them ordinarily. At these prices they should go like hot cakes. 4 for 10c; doz., 25c; per 100\$1.30, postpaid; by express or freight, per 100, 90c.

These mixtures must not be confounded with the common mixed sorts. We recommend this stock with perfect confidence, as it is composed only of choice varieties. Single and doz. prices include postage. The 100 rate is by express at purchasers expense.

Shades of pink mixed each, 3c; doz., 30c; 100, \$1.75.

Shades of red mixed, each, 3c; dcz., 20c; 100, \$1.00.

Shades of Yellow mixed, each, 4c; doz., 40c; 100, \$2.50.

White and light varieties, each, 4c; doz., 40c; 100, \$2.50.

Striped and variegated mixed, each, doz., 40c; 100, \$2.50.

Lemoine's Butterfly (large strained) varieties mixed, each. 4c; doz., 40c; 100, \$2.50.

Golden Rayed Lily of Japan.

GLADIOLUS SEED.

One of the most interesting branches of Gladiolus culture is the growing of bulbs from the seed. No skill or special care is required, and in the course of two or three years flowering bulbs will be secured. It is not only a very interesting and inexpensive way of securing a fine stock of bulbs, but there is almost sure to be found new sorts that are the results of hybridization and which could not be secured in any other way. Our seed is from the finest flowers and embrace hundreds of markings and colors. Gladiolus seed, pkt., 10c; oz., 25c, postpaid.

DAHLIAS. The extraordinary beauty of the new varieties of Dahlias that have been recently added to the already large and wonderfully varied list, have renewed the old-time interest in this majestic flower. Certainly no flower is more worthy of special attention. Our assortments comprise all the positive colors, in most striking shades.

CULTURE. A good mellow soil, thoroughly enriched with well-rotted manure, and an abundance of water upon the plants as well as at the roots during dry, hot weather, is the secret of success. Water overhead daily, or oftener, in hot weather. Splendid flowers in the hottest, dryest season, is the result. The tubers should not be put into the ground until settled weather, say May 20. Will book orders any time, but will not fill until about May 1.

	E	ach.	Doz.	Each	. Doz.

New French Cannas.
Only 15c each, 2 for 25c. Postage paid.

CHOICE FRENCH CANNAS. The marvelous improvement made in Cannas the last few seasons have seen no equals in the history of floriculture. From a mere description no adequate idea can be gained of the strikingly beautiful effect presented by their brilliant colored, immense sized flower heads. They commence blooming early in June and continue until late in September. Every shoot bears a flower, and so often as a truss of bloom is past its prime another shoot pushes out beyond it, and each stem blooms 3 to 5 times in succession. We are now able to offer the great novelties of last season at less than half price. We urge our customers who have not already provided themselves with the new French Cannas to give them a trial.

MIXED CANNAS. Scarlet flowered kinds. Many splendid colors. Each, 15c; 2 for 25c; doz., \$1.25.

MIXED CANNAS. Yellow flowered kinds. Many shades, variegated, banded, etc. Each, 15c; 2 for 25c; doz., \$1.25.

BEGONIAS. (Tuberous Rooted.) The flowers are very large and brilliantly colored, embracing every shade of pink, rose, white, scarlet, yellow and orange. Planted out-doors they present a dazzling show until killed by frost. Single: Scarlet, Orange, Pink, White, Yellow and Crimson. Each, 10c; doz.,\$1.00. Double: Scarlet, Orange, Pink, White, Yellow and Crimson. Each, 25c; doz.,\$2.50.

BEGONIA CULTURE. For growing in pots or boxes in the house, plant in rich, sandy soil, give good drainage and water freely after the leaves start, but do not let the soil become sour from over-watering. If it is desired to have a bed outdoors, select a shady, moist situation, making the bed rich with thoroughly rotted manure and leaf mold, if obtainable. Plant as soon as danger from frost is over. After the plants start into vigorous growth, keep well watered.

TUBEROSE, Double Dwarf Excelsior Pearl. The flowers of the Double Dwarf Pearl are larger and more numerous than in the common type. They are so fragrant that they perfume the atmosphere for some distance around.

CULTURE. Fill five-inch pots half full with cow manure, and on top of this good rich earth mixed with sand. When the weather is warm the pots may be set out-doors in earth. At the approach of cold weather the pots may be lifted from the earth and brought indoors.

TUBEROSE. DOUBLE DWARF EXCELSIOR PEARL (Choice Bulbs). Each, 3c; doz., 28c: 100, \$2.00. postage paid. By express at purchaser's expense, 100, \$1.25; 500 @ 90c.

VARIEGATED LEAF TUBEROSE. This is an early single kind, with striped foliage. Each, 7c; doz., 80c.

ALBINO. Flowers single, star shaped, pure white. Each, 8c; doz., 85c.

CALADIUM ESCULENTUM. (Elephant Ears.) A striking foliage plant. Leaves very large, often three to four feet long and nearly as wide. Very effective on lawns. Each. 15c; doz., \$1.40. Extra large bulbs, each, 22c; doz., \$2.35, postpaid.

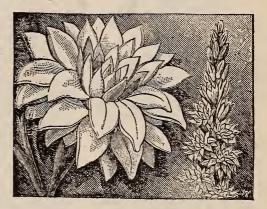

CLLTURE. Plant in rich soil and water freely.

OXALIS. Blossoms throughout the summer and fall. Foliage graceful and pleasing. White and rose pink. Doz., 8c: 100, 34c, postpaid.

GLOXINIA. Magnificent. Will bloom in six weeks from the planting of the dry bulb. Their splendid trumpet-shaped flowers are exquisitely tinted, blotched or tigered with minute dots of violet, pink or crimson. Bulbs, each, 18c; 3 for 50c. Seed, per packet of 100 seeds, 12c. Will bloom in three months from seed.

MADERIA VINE. (Mignonette Vine.) A climber with glossy green leaves. Flowers white and fragrant. Grows very rapidly and will cover the side of a small house in a single season. Each, 7c; 3 for 15c; doz., 50c, postpaid.

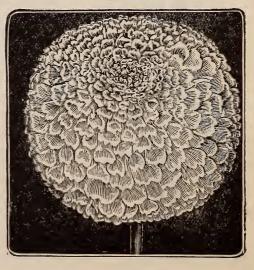

CINNAMON VINE. A climber that grows very rapidly, Foliage bright and lively. Each, 7c; 3 for 15c; doz., 50c. postpaid.

Excelsior Tuberose.

Note our price: Each, 3c; doz., 25c; 100, \$2.00.

Postpaid.

New Dahlias, 15c each; doz., \$1.60., postpaid.

IS YOUR LAWN FADING?

ARE THE GRASSES DYING?

If so, Do not Disfigure Your Lawn, Offend Your Senses, or Fill Your Ground with Weed Seeds by using Stable Manure, but apply EXCELSIOR LAWN DRESSING. EASILY APPLIED. NON-ODOROUS.

N. K. & GO.'S EXCELSIOR LAWN DRESSING. Is a fertilizer especially prepared for LAWNS. It possesses in best calculated to NOURISH THE GRASS, promote its LUXURIANT GROWTH, and the DAKK GREEN COLOR so greatly admired. It is not only the MOST PERFECT LAWN DRESSING that has been devised, but it is the most pleasant to handle, being NON-ODOROUS, so that its liberal use on a lawn cannot be detected by any unpleasant cotor. Being dry and fine it is EASY TO APPLY, and imparts such a VIGOR-OUS GROWTH to the grass that two or three applications during the Season at the rate of one pound to each 100 square feet of lawn keeps the grass in flourishing condition throughout the s-ason, and enables it to withstand the effect of the hot summer sun. We prepare but one kind of Lawn Dressing. This we do not believe can be excelled. It is put up in bags containing our brand. By express or freight, bag of 10 pounds, 75c; 25 lbs., \$1.50; 50 lbs., \$2.50; 100 lbs., \$4.50.

How to Apply the Excelsior Lawn Dressing.

The first application should be made early in the spring as soon as the frost is out of the ground. Care should be taken to scatter it evenly over the lawn, sowing it by hand. The first application should be made at the rate of 10 to 15 pounds fertilizer to every 1,000 square feet of lawn surface. If at any time afterwards it be noticed that the lawn is thin and light colored in spots a further application of Fertilizer will speedily restore its color. The fertilizer works best if applied just before a rain. If applied, however, when the weather is hot and dry, the application should be made early in the morning or late in the evening, and the lawn wet down freely, immediately afterwards. In seeding down a new lawn, apply broadcast, double the amount above mentioned, and rake it in thoroughly before sowing the seed. before sowing the seed.

The Use of Excelsior Lawn Dressing on Flowers.

By its judicious use, the health, vigor and free blossoming character of flowers will be greatly enhanced. The result of its use on flower beds is quickly seen by the dark green leaves and high color of blooms produced. To fertilize bedding plants, stir a teaspoonful, or more, according to the size of the plant, into the soil about each plant, and repeat two or three times during the season. After the fertilizer is used, water the plants

FOR HOUSEPLANTS, dissolve one teaspoonful of Fertilizer in one quart of water, and use the solution freely around the plants, stirring the solution while applying. It may be applied as often as the plant seems to require it; once every week or ten days until they are in the desired of Fertilizer, condition.

Root of Grass show-ing the effect of using Excelsior Lawn Dress-

POULTRY FOOD.

A Celebrated Artist, when asked with what he mixed his paints, replied "WITH BRAINS." Precisely so does a progressive Poultry Keeper mix his rations.

CRUSHED OYSTER SHELLS.

The most frequent cause of HENS NOT LAYING is the absence in the food of CARBONATE OF LIME. As ERUSHED OYSTER SHELL is practically pure Carbonate of Lime, it supplies, when fed to poultry, this most essential element, and greatly aids in the formation of the egg.

Advantages gained by the use of Oyster Shells.

It prevents "Cholera"; It keeps the poultry healthy; It makes hens lay an egg per day; It prevents soft shell eggs; It prevents Hens from eating their eggs; It makes the egg shell strong enough to carry without breaking; It contains many essential components of the egg; It makes eggs larger and heavier.

When you buy 100 lbs. of "Peerless" Brand Crushed Oyster Shells, you get 100 lbs. of Shells, not 15 to 20 lbs. of dust and dirt mixed in, as our brand is specially cleaned.

To get best results in Poultry Raising, the use of something of the kind is positively necessary. Every poultry house or yard should have a pan or trough full, so that the fowls can have access to them at all times. Put up in 100 lb. bags, our price, bag included 80cper 100 lbs.

Our Catalogue of Poultry Supplies, is now in preparation, write for it. It will save you money.

MICA CRYSTAL GRIT.

Hens having no teeth, should be kept constantly supplied with some sharp material, to grind and masticate their food

Mica Crystal Grit is superior to all other forms, as it is not only sharp and hard, but its properties are such that it acts as a tonic, and contributes largely to the health and productive power of the Fowl. Our price, for 100 lbs., (bag included) 90c. GROUND BONE. Per lb., 5c; per 100 lbs., \$3.00; bags free.

BIRD SEED.

Add to cents a pound for postage if wanted by mail We handle large quantities of Bird Seed, and can supply it either mixed or in bulk. We desire to call special attention to our Sterling brand, and to our Recleaned Canary, Hemp, Millet, Rape, etc., and to our very reasonable prices.

This mixture is so vastly superior to the mixtures usually put up under the name of "Bird Seed," (much of which is simply rubbish) as to cause the Sterling Brand, to meet with a steady sale wherever it is once introduced. It is an honest package of bird seed, made up from the finest and cleanest quality of re-cleaned Sicily Canary, Russian Hemp, German Rape and Imported Millet, contains a large piece of Cuttle Bone and weighs without the package 16 ounces to the pound. It is always packed in a round box, with red wrapper and under our registered trademark. Price 10c a lb., 3 lbs. for 25c.

BIRD SEED IN BULK. Lb. 100 lbs. 4c \$2.00 7 4.50 \$4.50 4.50 4.50 Canary..... Maw... Cuttle Bone.... Hemp....

HOW TO KEEP A LAWN GREEN, HOW TO BUILD NEW LAWNS, HOW TO REPAIR OLD LAWNS.

WILL SEND IT FREE. IF REQUESTED, WITH EVERY ORDER FOR LAWN GRASS.

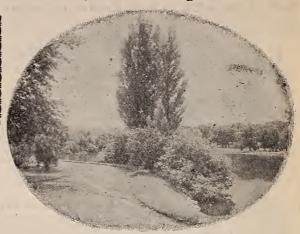

N., K. & Co.'s Sterling Lawn Grass. We prepare three grades of Lawn Grass Seed. which are kept constantly in stock. The best of these mixtures is N., K. & Co.'s Sterling Lawn Grass, which has been used with the greatest success on thousands of lawns. This mirrure is composed of a number of varieties best adapted to the purpose. Some of the grasses are early, others medium, and still others late. By this means as soon as one variety has ceased to be at its best, others are ready to take its place. Another important point is that, by the use of many grasses, a much heavier sward is obtained, than is possible with any two or three zorts, as no matter how much of one kind of seed may be sown on a given space, it will only support so many plants. If another variety, however, is sown in connection with it, a largely additional rumber of plants can be maintained, as they thrive on different elements in the soil. This mixture is unequaled to tennis and croquet grounds. Our Sterning, Qt., by mail, postpaid, 35c; qt., by express or freight, 25c; peck, \$1.15; bu., \$4.00, bags included. In 5 bu. N., K. & Co.'s Park Mixture. This is a fine mixture, the grasses used in its combination being equally as good as those in the Sterling Lawn flixture, but the contraining as many varieties or some of the migher-priced sorts used in the Sterling Mixture. It has given excellent satisfaction, and we commend

nigher-priced sorts used in the Sterling Mixture. It has given excellent satisfaction, and we commend it to those not wishing as expensive a mixture as the Sterling. Qt., by mail, postpaid, 25c; qt., by express, 15c; peck, 20c; bu., \$3.00.

N. K & Co. Lawn Grass. Good Mixed. Where a fine lawn is wanted, we always recommend that the best seed be used. There are places, however, that are not conspicuous and where all that is desired is a good, healthy growth of grass, where a cheaper mixture will answer every purpose. No better lawn grass for the money can be obtained than our Good Mixed, Qt., by mail, postpaid, 20c; qt., by express, 10c; peck, 60c; bu., \$2.00.

Special Mixtures. We are at all times glad to make up special mixtures of lawn grass to meet the

make up special mixtures of lawn grass to meet the requirements of existing conditions. We have been very successful where combinations of grasses for terraces, shady places, exposed situations, etc., were wanted.

View in Loring Park, Minneapolis.

OFFICE OF BOARD OF PARK COMMISSIONERS. MINNEAPOLIS, MINN

January 10th, 1897.

NORTHRUP, KING & Co., Minneapolis, Minn.

NORTHRUP, KING & Co., Minneapolis, Minn.

GENTLEMEN: During the past twelve years, in which I have been Superintendent of Parks of Minneapolis, our park system has been built, and we have been obliged to seed large areas to grass each year. It affords me great piecesure to state that during all this time I have found your Lewn Seed of a UNIFORMLY HIGH QUALITY. both as respects STRONG GERMINATING POWER and FREEDOM FROM UNDESKRABLE SEEDS, besides producing a turf of FINE TEXTURE and GREAT DURABLITY.

Yours very truly, W. M. BERRY, Supt.

The above statement from Mr. Wm. M. Berry, for the past twelve years Euperintendent of Parks of Minneapolis, and for the fifteen years immediately preceding, Supt. of South Park, Chicago, is a notable one, coming as it does from one of the most widely known and experienced Park Superintendents in the United States, and covering, as it does, twelve years continuous use of our Lawn Grass Mixtures in large quantities.

QUANTITY REQUIRED.

In order to secure quick and satisfactory results, a liberal quantity of Lawn Grass Seed should be used, as spots not seeded will surely be occupied by weeds. The usual rule is one quart for 300 square feet; four to six bushels for an acre.

"HIGHCROFT." Country Residence of Mr. F. H. Peavey.

MINNEAPOLIS, MINN., Jan. 3d, 1898.

NORTHRUP, KING & Co., Minneapolis,

Gentlemen: My Lawn at Highcroft consists of about eight acres, and was seeded with your Sterling Lawn Grass Mixture. It is a beautiful lawn, entirely satisfactory to me, and much admired by those who see it.

. ·

Yours very truly,

FRANK H. PEAVEY.

Strangers visiting Minneapolis almost invariably comment on the Beauty of its Lawns, both in the Public Parks and about the pri-vate homes. In a very large degree their fine appearance can be justly attributed to the uniform excellence of Our Lawn Grass Seed.

The **DOUBLE-TUBE** Lightning Insect Exterminator, No. 2.

IT EXTERMINATES EVERY INSECT obnoxious to your-TEXTERMINATES EVERY INSECT obnoxious to yourself, your animals or your crops.
Within the past few seasons it has been discovered and
thoroughly proven that the proper way to apply insecticides
is by means of a sprayer or atomizer, not only for economy
of material, but that the work is performed far
more effectively, as the Spray will penetrate
where the Liquid cannot be applied direct.
Last season there was an enormous demand
for Sprayers, and this led to the
construction of many Sprayers
or Atomizers, some of them
good; some of them poor. We
have examined carefully every DOUBLE TUBE SPRAYER well known Sprayer now on the market, as we wished to handle the best wished to handle the best only. Our choice rested on the DOUBLE-TUBE LIGHTNING as being the BEST SPRAYER on the market.

安米米

market.

This splendid new Atomizer is made with a Double Tube, and has double the capacity of any other sprayer made, covering a radius of two and one half feet, and production. The air chamber is of large capacity, and the reservoir holds two quarts, which is enough to spray 2,000 hills of potatoes. But one stroke is rewith any other machine made.

The DOUBLE TUBE LIGHTNING INSECT EXTERMINATOR uses less Paris Green and water than any other machine in existence on account of the spray being so fine. Not a drop of water is wasted. A tablespoonful of Paris Green and two quarts of water will successfully kill 2,000 hills of potato bugs of all sizes.

The Double Tube Lightning Insect Exterminator to the spray being the control of the spray being so fine.

and two quarts or water will successfully kill 2,000 hills of potato bugs of all sizes.

The Double Tube Lightning Insect Exterminator is highly recommended by florists and gardeners, as well as every lady who has house plants. Also by stock raisers for keeping flies from cattle and horses during the summer months.

PRICE.—The Double Tube Lightning Insect Exterminator is made both of copper and galvanized iron, neither of which will rust or corrode.

Having arranged for a large number of these Atomizers, we are prepared to offer them at the following very low prices, to go by express or freight at the purchaser's expense.

Galvanized Iron, 65 cents each; Copper, at 90 cents each.

No. 1 Lightning Atomizer. This is a Single Tube Sprayer, low in price, yet effective and durable. It has detachable reservoir, enameled inside and out to prevent rusting. It is thoroughly practical, and has given entire satisfaction to thousands of purchasers. Price for each, 45 cts.

With every Sprayer is furnished complete instructions for use, and formulas for the best emulsions, disinfectants, etc., the materials for which can be obtained cheaply at any drug store.

MORTHRUP, KING & CO'S

ITS VALUABLE PROPERTIES.

It is HULLESS.

It is BEARDLESS.

It is EARLY.

It WEIGHS OVER 60 POUNDS TO THE MEASURED BUSHEL.

It YIELDS WELL on POOR LAND.

It YIELDS ENORMOUSLY on GOOD LAND.

It makes BETTER PORK than CORN.

It makes EXCELLENT FLOUR.

The Straw makes GOOD HAY.

It is OF INESTIMABLE VALUE TO EVERY ONE WHO FEEDS STOCK.

The following letter from Mr. D. C. Carpenter will describe this valuable Barley and the uses to which it may be put, while at the same time giving the actual experience of one who has grown it largely:

NORTHRUP, KING & CO.,

Gentlemen: You ask me what I think of the WHITE HULLESS BARLEY. I have grown 60 bushels to the

acre, and it is the best grain to some for that grown 60 bushels to the acre, and it is the best grain to some for hay that grown Sow early and you can cut two crops from the same sowing.

As fattening feed for hogs it has no equal. It makes sweeter MEAT and nicer lard by far than corn. I fattened 20 hogs for one butcher here with it, and made a gain of 106 lbs. to the hog in five weeks. The butcher said that he never handled such fine pork before.

I have tried feeding it in all ways, and I find the best way is to grind it and feed dry, with clear cold water in another trough for them to drink out of. It grows very quickly and on any kind of soil. You can sow it after all other grain is sowed, and harvest it then before wheat and oats are ready. I have sown it as late as the 18th of June and made a good grain crop. Stock will cat the straw in preference to "slough" hay. The straw is small, with very heavy leaves. It stools wonderfully. Once used for hay for work horses, you would n't have any other.

For Flour it discounts Buckwheat. We use it all the time for hot cakes.

Yours truly,

D. C. CARPENTER.

For Grain sow 1½ bushels to the acre. For Hay 2 bushels. Price, Lb., postpaid, 30c.; peck, 75c.; bushel, \$2.00; 2 bushels, \$3.50; 10 bushels, \$15.00. Bags included.

For 10 cents a sample of this unique and valuable Barley will be sent to those who wish to inspect it before purchasing.

SPECIAL NOTICE. Last year we could hardly begin to fill the orders we received for WHITE HULLESS

BARLEY and were obliged to return money to many who ordered late.

MR D. C. CARPENTER.

NORTHRUP, KING & CO., Seed Growers, Minneapolis, Minn.
